Anxiety of Both Parties to Avoid All Appearance of Connection

GOVERNOR HASKELL'S CASE

President Roosevelt Replies to Mr. Bryan's Demand For

Washington, Sept. 23.—President Roosevelt tonight, following upon a prolonged conference with members of the cabinet at the White House, prepared and gave out his reply to Wm. J. Bryan, the Democratic candidate, relating to William R. Heart's charges that Governor Haskell, treasurer of the Democratic campaign committee, had represented Standard Oil interests, both in Ohio and Oklahoma.

Mr. Bryan had demanded proof of the charges, promising that if it were substantiated, Governor Haskell would be eliminated from the campaign.

Dismissing the Ohio case, which involved an allegation of attempted bribery, with the explanation that he had made no direct charges against Governor Haskell as regards that particular instance, President Roosevelt takes up the matter of the Prairie State Oil and Gas company's and argues that Governor Haskell's action in stopping legal proceedings begun by the attorney-general of Oklahoma demonstrates conclusively that he was controlled by the great corporation to which the

ney-general of Oklahoma demonstrates conclusively that he was controlled by the great corporation to which the Oklahoma company was subsidiary. Concluding, President Roosevelt says that no law-defying corporation has anything to fear from Mr. Bryan, "save what it would suffer from the general paralysis of business which would follow Democratic success."

Deeming the reply too long to be sent by wire, the method of communication Mr. Bryan had employed in his challenge to the president, it was forwarded by mail to the Democratic candidate at Lincoln.

Chairman Mack's View

New York, Sept. 23.—Chairman Mack
of the Democratic national committee,
today said that if the same evidence
was produced against Governor Haskell, treasurer of the committee, as was
produced against Senator Foraker, in
connection with the Standard Oil company, he would expect the treasurer to
act as Senator Foraker did, but that no
evidence had been adduced up to the
present tinge. The national chairman
said he had no communication with
the governor or Mr. Bryan with regard
to the charges that had been made.
Speaking of the report from Chleago
that the campaign fund of the Republican party was about \$300,000 he said
the fund in the Democratic treasury
was less than that.

Mr. Aylesworth Nominated. Newmarket, Ont., Sept. 23.—North York Liberals today nominated Hon. A. B. Aylesworth.

Women Missionaries.

Toronto, Sept. 23.—At a meeting of the Methodist Women's Missionary society, among the appointments made was that of Miss Mary Lawson to Kitamaat, B.C.

Port Arthur, Ont., Sept. 23.—Three Finlanders were killed today by gas in a well they were digging on the farm of a man named Erickson, eight miles from Stanley, Ont. In digging they struck natural gas, and were immediately overcome by it.

Fatal Trolley Collision

Saratoga, Sept. 23.—Four men were badly injured, one fatally, in a rearend collision during a heavy fog on the Hudson Valley railroad near Fort Miller today. Motorman Aubrey of Glen Falls died in the hospital and Motorman Kane is not expected to survive his injuries.

Norris on September 30 at 11:30 a. m.

Thirty Years in Prison

Thirty Years in Prison
Hackensack, N. J., Sept. 23.—A dramatic ending came today in the trial of August Bberhard for the murder of his aunt, a well-to-do Viennese widow, when the defense suddenly collapsed, a plea practically amounting to guilt was offered and the youth was promptly sentenced to serve thirty years at hard labor in prison. Eberhard heard the judgment of the court, thirty years in prison at hard labor, without a tremor and between two deputies he marched away to the cell with his head in the air.

HURRICANE SWEEPS THE BAHAMA ISLANDS

Governor Wilson Reports Much Devastation Wrought By Storm of Sept. 11

London, Sept. 23.—The Colonial Office today received a cablegram from Sir Guy Wilson, governor of the Bahama Islands, regarding the devastation wrought by the hurricane of September 11-13.

Sir Guy Wilson says that the islands of the Great and Little Inagua, Acklin Islands, Crooked island, Fortune island, Long island, Rumeay and Walling islands were swept by the storm. All vessels caught by the storm were either stranded or wrecked.

At Clarence, on Long island, the jail, the court house, all the churches and ninety-seven per cent of the dwellings were completely destroyed. No details have yet been received from any of the

have yet been received from any of the islands, and the distress is believed to be great.

C. P. R. STRIKE

Hon. R. Lemieux See No Prospect of Successful Intervention By Federal Government

Montreal, Sept. 23.—A special dispatch from Ottawa to the Star today says: "When Hon. Rodolphe Lemieux, minister of labor, arrived In Ottawa this morning, his attention was called to a report from Toronto that the railway brotherhood had decided to request the government to intervene in the Canadian Pacific machinist strike.

trike. Mr. Lemieux expressed the opinion All. Lemieux expressed the opinion that in view of the failure to preach a settlement under the industrial disputes investigation act, there is not much that can be done. He further expressed, as his personal opinion, that if the strikers would go back to work are only in the control of the strikers would go back to work are only in the control of the strikers would go back to work are only in the control of the strikers would go back to work are only in the control of the strikers would go back to work are only in the strikers would go back to work are only in the strikers would go back to work are only in the strikers would go back to work are only in the strikers would go back to work and the strikers would go back to work and the strikers would go back to work are only in the strikers would go back to work and the striker

Case of Disease Found in the Czar's Usual Winter Residence

ARISTOCRATS FRIGHTENED

Bubonic Plague Makes Fresh Outbreak in Venezulan

St. Petersburg, Sept. 23.-Not only

St. Petersburg, Sept. 23.—Not only has the number of cases of Asiatic cholera in this city increased today, but the disease has invaded the aristocratic precincts of St. Petersburg, it has reached the winter palace, one case having been discovered in the servants' quarters of the palace.

Other cases have been discovered in the palace of Grand Duke Nicholas Nicholaevitch, the Tauride palace, the palace of Prince Alexander Oldenburg, a son of the Emperor, and the Imperial opera house.

A number of diplomats and preminent society people have hurried their departure abroad, but the exodus has been checked to a considerable extent by the prospect of being held in quarantine at the frontier. That a panic prevails among certain classes is illustrated by the fact that many well-to-do people have ordered their newspapers discontinued during the epidemic. A grand duchess, residing abroad, who is one of these, explained that she feared contagion through the mails.

mails.

In order to test the efficiency of vaccination in cholera cases several graduates of St. Petersburg university voluntarily permitted themselves to be vaccinated, after which they drank a potion containing cholera germs.

Mashington, Sept. 23.—Cholera conditions in Manila are improving, according to Governor General Smith's depatch to the war department today. For the 24 hours ending at 8 o'clock this morning, there were 35 new cases against 55 for the preceding twenty-four hours.

Plague at Caracas

Willemstadt, Curacao, Sept. 23.— Letters received here from Caracas announce a fresh outbreak of the bu-bonic plague in the Venezuelan cap-ital. The disease is spreading, and a number of deaths have occurred among the people of the better class.

JOHN D. ROCKEFELLER APPEARS AS AUTHOR

Will Say Many Kind Things About Standard Oil in His

expressed, as his personal opinion.

If the strikers would go back to work unconditionally, they would receive every consideration from Sir Thomas Shaughnessy and Mr. McNicholl. He had assurances to that effect.

Proceeding, Mr. Lemieux said that no one regretted the situation more than himself, but nothing further could be done under the circumstances until public opinion reaches the point where compulsory arbitration will be accepted by both capital and labor.

The Witness says tonight that altogether since the strike started, the C. P. R. has engaged on the whole system of the point of the poi Proceeding, Air, Lemieux Sana that no one regretted the situation more than himself, but nothing further could be done under the circumstances until public opinion reaches the point where compulsory arbitration will be accepted by both capital and labor.

The Witness says tonight that altogether since the strike started, the C. P. R. has engaged on the whole system upwards of three thousand five them upwards of three thousand five himself that the few strikes, and it is estimated that the men who went out have lost over \$700,000 in wages.

The Witness that the men who went out have lost over \$700,000 in wages.

For fourteen years I have been under of such make of such men life-long companions. For fourteen years I have been only some to the company's office once."

Further on he says: "Another thing

view of the arrangement between counsel, however, he would consent to the disposal of the case on Friday next.

Escaped Drowning
Vancouver, Sept. 23.—Arthur M. Dobson of this city, formerly of the city hall staff, has returned from a trip in the Pemberton Meadows country, where he had a very narrow escape from meeting death in Stony creek, near Daisy lake. He was riding a horse across the stream, which was very high. The channel is full of boulders, and with the rushing water, the crossing was a dangerous one. The swift flow swept the horse off his feet, and the rider fell near enough to a rock to get a hold. The horse came against him, but he managed to retain his grasp. Finally the animal was recovered without much millour, A gun and other articles still lie at the bottom of the river.

Colonel Stopped Stray Bullet Coionei Stoppea Stray Builet
Helsingfors, Sept. 23.—Colonel Lelchay, of the fourth Finnish sharpshooters, was killed today by a stray
builet during the rifle practices. The
soldlers of the battalion were placed
under arrest.

Fort William, Ont., Sept. 23.—R. R. Roberts, a fruit dealer of Fort William and Port Arthur, was found dead in bed today at the Frederick hotel in Westfort this morning. Investigation by the coroner shows that he ended his life by taking laudanum, an empty bottle being found under the bed. No reason is known for the rash act.

Alberta Gold Story

Alberta Gold Story

Sedgewick, Alb., Sept. 23.—Rumors of gold near this town have been coming in from time to time, but have never been confirmed until this week. Almost forty claims have been staked, and active development will begin at once. A mining expert from Spokane has spent several days in the district and pronounces the discovery a valuable one. He left town this morning with samples, and will return shortly with machinery to develop the claims he and some friends have staked. Land is easily and cheaply worked and the field is easily reached, so it will prove very profitable.

CANADIAN PACIFIC TO SECURE CONTROL

Chicago Great Western Road Will Shortly Pass to Its Possession

Montreal, Sept. 23.—The departure of Sir Thomas Shaughnessy, president of the C. P. R., presumably for Minneapolis, today, and word from the west that active operations are going on in connection with the deal, leave small room for doubt that, the C. P. R. will control the future destiny of the Chicago Great Western Railway Company.

Sir Thomas Shaughnessy denied on Monday that there was any truth in the story, but it now appears the deal is made in the name of the Minneapolis, St. Faul & Ste. Marle Railway, controlled by the C. P. R., who own 51 per cent of the stock. Sir Thomas thus got out of committing himself to the announcement until ready to give out the same.

The Chicago Great Western, or "Ma-

present in the hands of receivers for better protection of the property, pending the formulation of a plan for inaning its requirements for retiring the per cent gold notes maturing between 1908 and 1912 and for providing improvements.

It has long been known that Sir Thomas desired to obtain Chicago connections, and the present deat seems to meet his desire.

Minneapolis, Mifin., Sept. 23.—Traffic officials of the Canadian Pacific railway were at the Ryan hotel, St. Pani, today, meeting with the traffic officials of the Chicago Great Western and Canadian Pacific railway were at the Ryan hotel, St. Pani, today, meeting with the traffic officials of the Chicago Great Western and Canadian Pacific railways.

W. R. Melnnes, Montreal, general traffic manager, and W. B. Lanigan, Winnipeg, assistant traffic manager, arrived this morning to meet the local officials. A the hearing was held behind closed doors, nothing could belearned as to the agreement reached. The meeting seems to confirm the rumors that the Great Western is to be merged with the Canadian Pacific.

This rumor is denied, however, by A. B. Stickney of the Great Western.

Winnipeg, assistant traffic manager, arrived this morning to meet the local officials. A the hearing was held behind closed doors, nothing could be learned as to the agreement reached. The meeting seems to confirm the rumors that the Great Western is to be merged with the Canadian Pacific. This rumor is denied, however, by A. B. Stickney of the Great Western.

SEARCH FOR THUGS

Hope Entertained of Securing Men Who Murdered Store Manager at Elkhorn

Elkhorn, Man., Sept. 23.—While the whole country from the main line of the C. P. R. south to the border has been carefully searched for the woburglars who murdered Michael Sagar yesterday, not the slightest trace of the robbers has been discovered. All the towns along the border have been notified of the crime, and the \$500 reward, and it will prove practically impossible for the fugitives to cross into the States in that direction.

In fact, it is believed now that the murderers are either hiding close to the town or have managed to secrete themselves in some passing train and escaped. A force of constables guard all trains passing through Elkhorn, and at each point in this district for one hundred miles all suspicious persons are being forced to give an account of themselves. It is thought the burglars are too experience to attempt to escape across the prairie, not being armed to risk a fight. Therefore when the vester in their customary, optimistic frame of mind. Shortly before the great of the content of themselves is fight the passer-

Stock and Fruit Displays Best in History of Agricultural Society

Over fifteen hundred people passed through the entrance gates to the provincial exhibition yesterday. The majority arrived just about the hour fixed for the commencement of the horse races. They hadn't gone earlier because of the inclement weather, somewhat heavy showers having had a because of the inclement weather, somewhat heavy showers having had a deterrent effect on the general enthusiasm. But it was Citizens' Day, all the principal business establishments had closed for the afternoon, and when the clouds rolled away and the sun warmed the atmosphere, the crowds couldn't be held back. The Mecca for all was the fair grounds, and although the B. C. Electric Rallway company had put all their spare rolling stock on the run, there wasn't sufficient to get everybody there as fast as they desired. Soon the grandstand was comfortably filled and the fence, encircling the track, lined with men and women anxious to see the trotters and runners at work. A Jostling but merry throng moved back aid forth among the aisles off the main building, examining and admiring the varied exhibits. The merry-go-round and the different side-shows did a thriving business. In short the gloom created by the rain was converted into the animated and somewhat noisy seene which usually marks Victoria's show.

Ovaliant And the fruit Display Whatever else may be said of the fair this year, the fruit display certainly stands out supreme as one of the best exhibits ever seen anywhere. Judge F. Shepherd stated that it was the best that he had ever seen in any part of the world, and as Mr. Shepherd comes from the fruit growing sections of the state of Oregon, his dictum may fairly be taken as impartial. The plums were perfect, and the apples unsurpassed, and for the first time the apples grown on Vancouver island—beat those from the Okanagan, showing conclusively that as good apples can be grown in this also deserves special mention. In no respect, probably, has greater progress been made in the fruit industry of Victoria and vicinity than in the methods of packing. It is no longer haphazard. The apples are graded according to size and are fitted, tightly into the boxes, the different layers be-

The Poultry Show

To lovers of the industrious hen the poultry show at the fair is one of the most interesting attractions. It is unusually well patronized this year, the entries being quite heavy and of a uniformly fine quality. All the familiar breeds were there from the saucy bantam to the clumsy cochin china. At either end of the building set aside for the display of cocks and hens were sundry intruders of various kinds. Thus near the entrance by the bantams were a number of pigeons. kinds. Thus near the entrance by the bantams were a number of pigeons, while at the other end a goodly selection of ducks were to be heard quacking voeiferously in protest at their enforced stay on dry land, and above the ducks were a number of rabbits and hares.

The coops are arranged in rows down the room with passage ways between so the examination of the birds has been made as easy as possible. The Plymouth Rocks were per-

TRUCKS

VICTORIA TRANSFER CO., LTD. Phone 129.

haps the best represented, anyhow they were there in force, Mrs. Griffith carrying off the prize in the white varieties with some very fine birds indeed. Besides the white, buff and barred birds were also freely shown. Then there were Anconas, and black Minoreas and black Orphigtons. There was a brave display of the popular Leghorn, both white, brown and buff. Wyandottis too were seen and a number of the speckled Hanburgs. Rather an uncommon fowl was the crested Pollsh, whose white top knot attracted a great deal of attention, especially from the ladies. A coquettish looking bird is the Pollish, though one fancies that at times he may look anything but trim in the dust of the barn yard. But yesterday they had a most courtler like appearance along-side their more sombre hued companions.

There were a few Andalusians, a large, strikingly handsome groy bird. These also attracted much admiration and seemed to be a new breed to many of the visitors. And in fact, although well known to fanciers, the Andalusel.

These also attracted much admiration and seemed to be a new breed to many of the visitors. And in fact, although well known to fanciers, the Andalusian is not a common denizen of the average western chicken run. Then again there were light Brahmas and a number of Dorkings.

The game birds are placed in a row off by themselves at the side. There is quite a selection of them, and more than one of the cocks looked as if he had been engaged in numerous battles. One cock in particular, a fine but dissipated looking bird with a most rakish air, boasted but one feather in a tail which, to judge from that solitary specimen, must normally be quite an ambitious appendage. He may have been moulting, though its plumage otherwise did not look like it, but he had all the appearance of having recently emerged from some strenuous encounter. Several of the other game cocks had rather a battered appearance, though otherwise fine birds.

Altogether it was a good show with enough competition to ensure that the prize winners in each class were birds of real merit. Some electric incubators were also on view with a demonstrator in attendance.

H. W. DAVIES, M.A.A. SEEK ASSURED INCOME FOR THE SANITARIUM

Members of Anti-Tuberculosis Society to Meet to Con-

sider Means Owing to the semi-proclamation and observance of a half-holiday in honor of Citizens' Day at the fair yesterday,

Owing to the semi-proclamation and observance of a half-holiday in honor of Citizens' Day at the fair yesterday, the special meeting of the Anti-tuber-culosis League, which was called for three o'clock at the city hall yesterday afternoon, was postponed until three o'clock on Tuesday afternoon next at the same place. As a matter of fact the doors of the city hall were found locked, and a meeting became practically impossible. Among those who answered the call were: Mrs. Frank S. Barnard, the president of the Victoria society; Mrs. Tye, Mrs. Cole and Mr. A. S. Barton. The object of the meeting is to devise ways and means for providing an assured income of \$10,000 a year for the Sanitarium at Tranquille, near Kamloops, which is required for maintenance purposes, and it is hoped that the meeting on Tuesday next will be largely attended, in order that this subject may be otherwise. Mrs. Barnard states that the petty contribution of \$1 a head from 10,000 families in this province will easily doo the trick perfectly, and more would be accomplished by setting apart the magnificent sum of two cents per family per week, it should not be altogether impossible to secure the amount in question; if the matter were seriously considered upon this basis. For as each family is commonly supposed to consist of five persons, two-fifths of—or. Jess than half, a cent per head—would bring into the society's treasury a little more than the \$10,000, which are absolutely needed. And British Columbia, it is urged, ought surely to be able to deny themselves so much as two cents a head per week for each family for this object.

Down in the semi-sayage countries Down in the semil-sayage countries of Central America the governments build and wholly maintain all the hospitals, while no charge is made for treatment, unless the patient asks for and secures a private ward; but this privacy is sometimes impossible, as all these hospitals are not provided with such conveniences. The nurses are supplied from the nursing orders among the Sisters of Charity.

BRITISH CONSUL AT COLIMA IN CITY

Discusses Progress of the Pa-cific Ports of Mexico— Trade Chances

Mr. D. G. C. elevated backbone that stretches all the way down the North American Continent from Alaska to the Isthmus of Panama. The Southern Pacific Railway Co., which has been operating for some years on the western coast of Mexico, is now building from Guaymas on the Gulf of California, to the somewhat commanding seaport town of Mazatlan, which it will reach in perhaps another year. But the Mexican Central Railway, which is by all odds the most important railway line in the whole country, is now engaged in the great work of constructing the immense plateau of the interior with the populous town and leading commercial mart of Guadalajara, which is the second city in that country, coming next to the capital, both in the matter of population and importance as a trading centre. Its inhabitants number about 200,000 at the present time, and it promises to become much larger. This very necessary link will be completed some time next month, in October, and the event will be marked by ceremonies of a very imposing description.

by ceremonies of a very imposing description.

President Diaz

"President Diaz, who has for such a length of time been the beneficent autocrat of Mexico, and who has also proved himself to be a very just and sagacious ruler, will be present upon this momentous occasion, as well as all the foreign ministers, including particulary Mr. Tower, the English minister, who is peculiarly persona grata with the all-powerful president, as well as among the leading citizens of the republic; and Sir Wheatman Pearson, of that remarkable firm of English contractors, Pearson & Sons, of London, Eng. As is very well known, this firm, in conjunction with the Mexican administration, improved and practically rebuilt the Tehuantepec railway, creating great termini upon either coast and providing these splendid and almost wholly artificial harbors, with the latest and best devices in the way of machinery to facilitate the loading and the unloading of enormous freight carriers and the trans-shipment of goods to and from Europe, as well as from both coasts of North America. This magnificent enterprise promises to be crowned with all the abundance of success that its warmest friends could desire, and it must be remembered, when its chances are measured against the Panama canal, that by the time that the Panama canal is opened for actual traffic, trade will have become very strongly entrenched in this route; which is moreover, as far as northern countries are concerned, considerably shorter than the other channel of communication. This new road of Guadalajara-will further be standarized, using the broad instead of the narrow guage, which is commonly used upon the railway lines in Central America.

Colima will then be brought within twenty-six hours of the City of Mexico, and within sowe bear.

Colima will then be brought within twenty-six hours of the City of Mexico, and within seven hours of Guadala lara.

Mexico, and within seven hours of guadalajara.

"The raising of cocoanuts is paying it the growers very large profits at the present time; as during the past few years the price of these nuts has increased about 300 per cent; for while the growers formerly received from \$1 to \$1.50 a hundred, they are now getting as much as \$5 per 100 nuts; while the business is done, not with foreign countries, but with the native population in the interior. These ripe cocoanuts have hitherto of necessity been shipped from Colima on mule back; but as they will soon be able to send them away by rail, the profits of the growers will be made even greater than they now are.

The only objection that can be taken to embarking in the very profitable enterprise of owning and managing a cocoanut plantation is that it takes fully five years for the trees to reach the bearing stage. These plantations are to be found along and for some 18 or 20 miles back from the coast, as this tree requires both sait and lime in order to attain its highest perfection. The Collma district abounds in limestone formation, and the sea supplies the sait.

THE MINING INSTITUTE

The visit of the Mining Institute and their guests to Victoria was brought to a close last night by a very interesting function held in the Parliament Buildings. This morning they begin their homeward journey. While as was to be expected in the case of gentlemen seems on this subject as upon others whose views carry weight with them, they are guarded in their expressions of opinion, it may be said with con-fidence that the impression produced upon the entire membership of the in the opinions expressed by his leader party has been distinctly favorable, and that the reports which they will carry back with them will add greatly to the intelligent interest taken in Canada by the mining world. of the party said last night: "Here-after Canada will be to us something more than a name. It is difficult for a man in England to realize the magnitude of the Dominion and its marvellous possibilities. Perhaps we can assist in bringing about a better understanding of the facts." Another said that he thought the people in England, with whom he was associated, would send out a representative to make a more detailed examination of British Columbia. Another expressed the opinion that the leading mining houses would send representatives to Canada. Others spoke of the great field remaining to be explored. Indeed the impressions of the whole party seem to have been just what we all hoped for. The Colonist wishes them all a pleasant

ORIENTAL EXCLUSION.

The Colonist in treating the question of Oriental exclusion has endeavored to do so from the Imperial point of view, while it has recognized and always been careful to point out the British Columbia are chiefly concerned in securing such legislation as will Western Canada from being overrun by races that are allen to us manners, customs and all those qualities which distinguish the several divisions of mankind. We have dealt with the question as we found it as a temporary settlement of the with the question as we found it and pan sees fit to live up to it. But we hence we counselled moderation on have protested that it was a grave the part of those British Columbians who felt especially keenly on the questoin, and we accepted the Lemieux the humiliating position of being comagreement as the best temporary arrangement possible under the circumstances, which had arisen out of what we regarded as the exceedingly unwise policy of the Laurier Ministry. Our views were quoted with approval both in Japan and the United Kingdom by journals of prominence, which endeavored to with a great issue soberly and without appeals to prejudice. In presenting this question as an issue in the present election we desire to put it upon the same high plane, to regard it as something more than of local concern, but as a matter which must of necessity have an important bearing upon the future and perhaps upon the future of the

very great majority of the people of migration. He was not then, as he is British Columbia desire that the exclusion of Orientals shall be the settled He does not consider it necessary to policy of Canada. On this point it is preserve British Columbia as a white hardly necessary to make an argu- man's country. He has only given us the strength of this sentiment cannot tection, which we now enjoy because be measured by the number of people who interested themselves in the of the people of this Prevince. When League. That organization is compos- lons, he acted in a manner which has ed of only a very small minority of placed Canada in the hands of Japan those who wish to see British Coiso far as immigration from the latter umbla remain a white man's country. If the people of the province could be polled they would declare for exclusion by an overwhelming majority. We think, therefore, that it is of very great importance to have the exact po sition of the question well understood, so that when the people may have the opportunity, if they see fit to take it, to go on record in respect to the Asiatic policy of the government.

That there would have been no exclusion of the Japanese if Sir Wilfrid Laurier had consulted his own wishes, is a proposition which no one, famimoment of disputing. The Premier is on record on this point. We have already quoted from one of his statement that he did not share the views of the people of this province in this regard. Nor is Sir Wilfrid the only member of the Cabinet who is on record on this point. Mr. Lemieux, Postmaster-General, made a speech during the last session, which reported on page, 2145 Hansard. He was attacking Mr. Borden having favored a policy of total ex-

"Mr. R. L. Borden .- Might I ask the Honorable Minister whether his policy is not for a white British Columbia? "Mr. Lemicux .-- No, Sir.

In the course of the same debate Mr. Fisher, Minister of Agriculture, spoke. Among other things he said:

"Many of them may come in. am not so much afraid as some people them will come in There was an allusion made cultivate it as a Japanese farm. I do not know that there will be any great injury to the people of Canada to take 10,000 acres of the Northwest which is not highly cultivated and which is not highly productive and place it under Japanese methods of cultivating. I do not know that it would hurt, and I have confidence that if a few thousands, or a few tens of thousands, or I do not hesitate to say, if a few hundreds of thousands of Japinese came into Canada the present Canadian people will still rule this land. For these reasons I am not so very much afraid of Japanese immigration." (Hansard 1908, p. 2122.)

We are unable to cite any expression of opinion on this subject from Mr. Templeman, because our representative in the Commons and in the Cabinet directly affecting the interests of his Province, to have refrained from exever, in concluding that he must share and colleagues or he would not have remained in the Cabinet. Therefore we are only presenting the bald facts of the case when we say that Mr. Templeman comes, before the people of Victoria, asking for re-election as a candidate, whose policy on the Japanese question was expressed by Sir Wilfrid Laurier, when he said he did not share in the views of the people of when he said he was not for a white British Columbia, and by Mr. Fisher, when he said that many Japanese to have them come. This is the exand Mr. Templeman's personal views, of which we are not advised, are altogether beside the question. A vote for Mr. Tempieman means a vote for the policy towards the Japanese as expressed by the Premier, the Postmaster-General and the Minister of Agri-

To these contentions the answer will be that the Lemieux agreement meets all the requirements of the case. have always been ready to estimate that agreement at its full value and can point to the files of the Colonist have not joined in the assaults that were made upon Mr. Lemieux and the Government, of which he is a member, that have come from one quarter, nor have protested that it was a grave error in policy on the part of the Don'inion Government to place Canada in pelled, in a matter so deeply affecting the welfare of Canada, to place herself unreservedly in the hands of the Japanese Government. The primary minion and the consequent undue taxwhen Sir atlon of the people." Observe, in-Wilfrid Laurier refused to give effect creased expenditure in 1893 meant unto the wishes of the people of this due taxation. When this platform Province by passing or permitting was under discussion Sir Wilfred Lauthem to pass legislation in the nature of the Natal Act. This error was accentuated when he agreed to accept the Anglo-Japanese commercial treaty without stipulating for any reservaafter the Colonial Secretary asked if any such reservations were desired by Canada. It is easy, in view of the opinion since expressed by him, understand why Sir Wilfrid Laurier did not think it necessary to reserve We take the position, first, that the the power to deal with Japanese im-We may say, however, that the small measure of temporary prothe of the people of this Prevince. When of the Asiatic Exclusion he was free to act upon his own opin-

> out what we have just said. That letter (a) affirmed the full right of Ja

panese subjects to enter and reside in Canada and expressed the opinion that the Japanese Government would have regard to special conditions in Can ada before insisting upon the complete enjoyment of such rights;

ter to Mr. Lemieux, which fully bears

(b) declared that the Government would take efficient mean: to restrict emigration to Canada and liar with the facts, will think for a for that purpose would give considerations to local conditions in Canada;

(c) expressed regret that the Japanese Government had not found it speeches, and we shall reprint the expossible to acquiesce in all the protracts, if the quotation is disputed, a possis made by the Canadian Government.

> We shall not prolong this article by dealing with all the other phases of this exceedingly important subject What has been said above will serve as preliminary to a further discussion of it and we shall leave it today by a reference to what we think is the duty of the voters of Victoria under the circumstances. This is, we submit, to signify by their votes on the policy of the federal government on

Templeman represents that policy. A vote for him will be construed into a vote in favor of that policy. We do not think that he will dispute the following proposition: If he is re-elected, his re-election will be accepted as a declaration by the voters of Victoria that they approve of the Laurier afternoon to a proposal to take 10,000 toria that they approve of the Laurier acres of land in the Northwest and policy in regard to Japanese immigration. There are many voters in his constituency who are very strongly opposed to that policy, and yet have never allied themselves with the Conservative party. They are for the most part men who are indisposed to ally themselves permanently with any party, and hold themselves free vote as their judgment dictates. They are not much affected one way or the other by charges of maladministration, for they things as a part of the game of polities. They do not concern themties. They do not concern them-selves much about the subtieties of tariff legislation. They endeavor to familiarize themselves with the greater issues of the day. To the consideration of such men we submit, with much confidence, the facts above set out. There are those among them who feel so keenly on this one question that they would favor a candidate running specifically on the platform of Asiatic exclusion; but votes cast for such a candidate would be votes cast away. They would be regarded abroad as exhibiting the full strength of the feeling in favor of exclusion, which they would not do. A unique this city. In Mr. Templeman they have a candidate who must accept the full responsibility of the mistaken and Laurier government in its dealings elected, he can claim that this policy claim the verdict as one of endorsation, and the government of Japan will look upon it as indicating that the feeling against immigration from Therefore, in order that the sentiment of this constituency on this issue ma be expressed in a manner that will admit of no misunderstanding, we call upon all those voters who believe in keeping British Columbia a white country to vote for Mr. Bar nard. Other aspects of this issue will be considered in subsequent issues.

EXPLANATION WANTED

Mr. Templeman has on one or two occasions expressed himself as ready to explain anything and everything alleged against the Laurier Govern-This is a very praiseworthy ment. disposition on the part of the Minister but we fear if he really endeavors to "make good" he will have the busfour weeks. However, his intentions are so much in the right direction that we propose to help him as much as we consistently can. Obviously the best way to get desired explanations is to state cases, which mall for explanation. Here is one

In 1893 the Liberals adopted a platform and among other things there view with alarm the large increase of rier said that if the people understood, "the present government would be chased out of power as the robber was chased out of the Temple," and two years later in a speech he said, 'We are the party of low taxation. This was the Liberal profession;

now for the Liberal practice. In the fiscal year ending June 30, 1896, the Conservative Government collected in customs \$19,833,279, and in excise \$7,926,006, a total of \$27,759, 285 in taxation, which was \$5.46 per head of the population,

In the fiscal year ending June 30, 1908, the Liberal Government collected in customs \$57,338,666 and excise \$15,690,400, which was \$11.70

per head of the population. Now what we would like to have from Mr. Templeman is:

1st—How he squares the Liberal profession with the Liberal practice. 2nd-How he expects the people to believe that his government has re-

duced taxation. Minister of Foreign affairs sent a let- | Ple

> The display of fruit at the exhibi tion is admirable. It is a splendid demonstration of the possibilities of

Notwithstanding the rain in the latter part of the morning and the early part of the afternoon, the exhibition was very well attended yesterday Very great satisfaction was expressed by the numerous visitors.

The Times rises to remark that Mr. Borden is never likely to bring fame to Canada. This is an exceedingly statesmanlike observation for our con temporary to make. It is of a class that has its origin in pure ugliness.

When he is going up, the man who this very momentous question. Mr. sits on the balloon trapeze is an ex-

ceedingly interesting person. he comes down, he is less so. he reaches the ground unhurt he ceases to be any one. Wherein there ls a marked resemblance between parachute jumpers and politicians.

There seems to be no doubt that Bryan is making a great deal of headway. At least we hear more of him in the papers than we do of Taft. It looks as if the people of the United States were not taking kindly to the idea that Mr. Roosevelt should nominate his successor.

There is a movement in the United States to have the election expenses of candidates paid out of the public revenue. When we look over the payments to some of the Canadian newspapers we are inclined to think that this system has been adopted to some extent in this country.

The regularity with which the Liberals are carrying constituency after constituency in their minds is one of the most surprising features of the present election contest. By and bye, when the votes are counted, it will be found necessary to reverse the verdict in the majority of cases.

The Hamilton Spectator is very angry because Sir Wilfrid Laurier says that protection as an issue is dead. We do not see what cause there is for feeling. If there is a man in which they would not do. A unique Canadian public life, who is a free opportunity is afforded the electorate trader, and the Spectator knows where caught and labelled.

The story of the wreck of the Star of Bengal on the Alaskan coast is one with Japanese immigration. If he is of the saddest tales of the sea that has been told for a long time. has been ratified by the electors of worst part of it all is the charge of Victoria; Sir Wilfred Laurier can cowardice made against the captains of the tugs who did not go to the assistance of the stranded vessel. This is a point upon which judgment ought to be suspended until the whole story that country is largely artificial and the work of irresponsible agitators. down to sea in ships, are not open to such a charge.

> A Canadian party went from Lake Superior to Moose Factory on James Bay, thence along Hudson's Bay and out the straits to the ocean, ending their journey at St. John's, New-foundland. They traveled in all 6000 miles and made the most of their opportunities to explore a little known land. They testify that the resources in the way of fertile soil, timber, fisheries and minerals are very great, and they express themselves as confident of the practicability of the Hudson's Bay route.

Thy motor speed manta has proven serious in Montreal that the Star that city demands that "manof that city demands that slaughter by automobile shall hereafter be treated as a crime." sympathize with the strong views expressed by our contemporary, but are glad to be able to say that the crusade against high speed, inaugurated in Victoria by the Colonist, has led to excellent results, and that the very great majority of our motorists show every disposition to keep within reasonable limits.

The Canadian Courier draws attention to the fact that audiences Quebec are rarely Quebec are rarely aroused to great enthusiasm by public speakers. This been accustomed to think. By the way, the Courier has a picture showing a number of those present at Sorel when Sir Wilfred Laurier made contains a remarkable number of very fine-looking people, men and women, who in stature and general appearance would compare very favorably with any similar number selected at random by the camera in any audience in the world.

The Canadian Pacific Railway Com pany has issued a pamphlet of 51 pages with a map, and bearing the title "Some Resources and Openings." It describes the several provinces in a reached by the railway system, tells of business in which there are openings, It describes Victoria as ideal residential place on the globe,' and says of Alberni that "it is bound to become one of the most important towns in Canada." Of Vancouver if ard—Why he and his colleagues hould not be chased out of the Temchiefly because of what it says of the towns in the Prairie Provinces.

The Hampton Vine.

The famous vine at Hampton Court ill continues to thrive, in spite of its demonstration of the possibilities of this province.

Mr. Mackenzie King is to enter polities. We are not sure just how we feel about this. In his official position Mr. King seemed to be very much the right man in the right place.

The Ontario Bank shareholders in addition to losing their stock will lose about \$1.50 on each \$1 of their investment. In all they will have to contribute three-quarters of a million dollars.

The famous vine at Hampton Court still lose advanced years, and its crop of 220 bunches will be ripe next month. Of course if it were allowed to do so the vine could bear many more, but the greater part of the crop is thinned out every year for the good of its health. As it is the aggregate weight of fruit will be about 3 cwt. this year, the bunches averaging 1½ ib. apiece. Planted as a slip a vine growing at liford, Essex, in 1768, the Hampton Court veteran has now attained a girth of 4 ft. 6 in, at a foot from the ground, and covers a roof space of 2.200 square feet. Lord Breadalbane's vine in Scotland covers more than twice that space and bears well, but beside the Hampton Court vine it is advanced years, and its crop of 220 bunches will be ripe next month. Of course if it were allowed to do so the vine eould bear many more, but the greater part of the crop is thinned out every year for the good of its health. As it is the aggregate weight of fruit will be about 3 cwt. this year, the bunches averaging 1½ ib. apiece. Planted as a slip a vine growing at liferd. Essex, in 1768, the Hampton Court veteran has now attained a girth of 4 ft. 6 in, at a foot from the ground, and covers a roof space of 2.200 square feet. Lord Breadalbane's vine in Scotland covers more than the court vine it is advanced years, and its crop of 220 bunches averaging 1½ ib. apiece.

The French government has decided to place the lower fortifications of Mont Saint Michel under the category of "historic monuments." It was high time that this should be done, for various schemes were on foot, tending to improve the approach to certain hotels and cafes, which would have further disfigured the island. This satisfactory decision is largely the result of the agitation carried on for many months by that admirable organization, the Touring Club of France.

The way to conquer the foreign artisan is, not to kill him, but to beat his work—Emerson.

NOTE AND COMMENT

soldiers is often complained of, it is a curious fact that Russia is the only country in Europe where a shortage of military officers is experienced. A despatch from St. Petersburg says:

patch from St. Petersburg says:

Bad pay and uncertainty in the tenure of office make Russian officers slow to come and quick to retire. This difficulty was experienced by the War Department even before the war with Japan. Since that time the number of Russians willing to accept and retain commissions in the army has steadily decreased. This insufficiency of commissioned officers existed to some degree before the war and for a while occreased. missioned officers existed to some de-gree before the war and for a while oc-casioned from 1,000 to 1,500 vacancies. Since the declaration of peace it has become aggravated so that in the in-fantry alone 3,000 officers are needed. In many regiments only half the usual number of officers are found, and it is feared that matters in this respect-may become worse still unless some remedy be devised. Undoubtedly the main cause which forces officers to retire from the army is the inferior pay. It is on this account that the war department is working out a project which is is on this account that the war department is working out a project which is to be laid before the Council and Douma as soon as these bodies assemble. There is not the slightest doubt that the position, for instance, of the lower-rank officers will be improved. The press have already announced that this step is to be taken. A much more important circumstance which has occasioned a diminution in the number of officers has been the unnecessary dismissal of so many of them at the conclusion of the war. At that time 800 supernumerary staff officers were for various reasons cashiered. Among these were not only men who might be considered less capable than others, but also men whose previous record showed them capable of doing good service.

ABOUT PEUPLE

The Duchess of Buckingham and Chandos, whose first novel is just out, has already writet travel-books, and emost fascinating story-book for building the content of the work and the Cheeses." But she is by no means the only novelist among the wearers of the strawberfy leaves. The loursest of Leeds has written "Capple-clos" and "A Lover of the Beautiful," while the versatile Duchess of Suther-and may be described as novelist as well as a number of short stories; while the versatile Duchess of Suther-and may be described as novelist as well as playwright, poet, blographer, journalist and social reformer. The lower of the star of distinction and an athers, but also men whose previous and the Cheeses." But she is by no means the only novelist among the wearers of the strawberfy leaves. The lourse of the same withing the conclusion of the war. At that the conclusion of the war. At that the conclusion of the war and the cheeses." But she is by no means the only novelist among the wearers of the strawberfy leaves. The lowers of the strawberfy leaves. The l

The Ruined City.—We have received photographs, by Maynard, of Barker-ville, as it did appear before the con-diagration.

ABOUT PEOPLE

Among these were not only men who might be considered less capable than others, but also men whose previous record showed them capable of doing good service.

Many solutions have been offered for the vexed problem of the proper places of the sexes in the drama of life, Still another has been offered in London, according to a correspondent of Sept. 16.

Father Bernard Vaughan a few days ago made some striking references to the changing relations of the sexes in the course of which he expressed the opinion that people of today were face to face with a sex problem that could be understood aright only whon men had become more manly, and women more womanly. To him, it seemed, as though the modern man was fast becoming effeminate, while the modern woman hankered after masculinity. "The typical modern woman," he said, "apes after everything mannish. She would like to dress like a man, Stalk about, and lounge like a man, Stak aman," These remarks, however, as he afterwards explained, he directed against the modern woman who yelled from the housetop that she must and will have her rights, and who roughly handled the policeman in his endeavor to, keep the peace. Her, indeed, he lik, end to a wild thing from the Scopin and on every theme expressed in any little for the properly treated are infinitely unfortunate and inopportune occurrence. A strike in any line of trade is a misfortune at with a special interest:

The Toronto Weekly Sun (Goldwin Smith's paper) is possibly the one publication in Canada which on every occasion and on every theme expresses an independent opinion. With this in mind-one may read the following repetiting the strike of the Canadian Pacific machinists is a peculiarly unfortunate and inopportune occurrence. A strike in now line of trade is a misfortune at its now the properly in the following repetiting the strike of the Canadian Pacific machinists is a peculiarly unfortunate and inopportune occurrence. A strike in now line of trade is a misfortune at its name that the properly in the original foun

BRITISH OPINION

While in other countries a paucity of soldiers is often complained of, it is a surfous fact that Russia is the only country in Europe where a shortage of nilltary officers is experienced. A despatch from St. Petersburg says:

Bad pay and uncertainty in the tenire of office make Russian officers slow in come and quick to retire. This difficulty was experienced by the War Department even before the war with fapan. Since that time the number of Russians willing to accept and retain commissions in the army has steadily lecreased. This insufficiency of complishing of officers existed to some degree before the war and for a while occasioned from 1,000 to 1,500 vacancies. Since the declaration of peace it has become aggravated so that in the infantry alone 3,000 officers are needed a many regiments only half the usual unber of officers are found, and it is eared that matters in this respect. may become worse still unless some remedy.

one which appeals to the ethical feelings of the community.

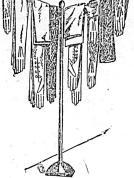

When the motor car was first introduced in England it did not inspire much antagonism in the public. On the contrary, says the Morning Post it usually afforded a theme for goodnatured ridicule and banter. It is only since it has come into general use that there has been a formidable outcry against the evils and annoyances for which it is declared to be responsible. The charges against motor cars really resolve themselves into one main charge that those who use them show a serious disregard for the comfort and safety of other persons on the roads. Cars are now built to travel at high speeds, and the fascinations of rapid movement, combined with a natural desire to cover ground quickly, presents temptations to drivers which they are too often unable or unwilling to resist. The passion for pace has undoubtedly a tendency to grow, especially among those to whom the pursuit is novel, and the exhibitration of rushing through the air does much to deaden the sense of prudence and to induce a reluctance to slow down except under pressure of necessity. No doubt there are many motorists who display judgment, care and consideration for others. Unfortunately, however, it is usually the inexperienced drivers who display the greatest recklessness, and, as the use of motor cars is rapidly increasing, the number of beginners is constantly being replenished.

beginners is constantly being replenished.

M. Paul Leroy-Beaulieu commenced in the debate of last Saturday, says the Morning Post, the examination of a phenomenon in vital statistics which it is no longer possible for the civilized States of Western Europe to put lightly aside as a peculiar product of the Gallic temperament. A diminution in the birth-rate, which is noticeable in the Cerman figures and conspicuous in those of some of the British colonies, is making itself felt—and very strikingly so—in the United Kingdom. What France is experiencing today it is clear the other civilized States may, and probably will, experience tomorrow, and the problem now causing alarm in France is coming to have a very intimate interest for foreign observers. Progress and the ideals of the future, the most limited modern intelligence sees clearly, lies not with the parent, but with the child, and the struggling middle-class man realises that a small family of well-educated children enjoying possibly a university education are of more real benefit to the race than a number of children only partially cared for and partially educated. The danger lies less in the diminution in the number of the family than in the seductiveness of the more intensive civilization. Wisely directed State action in the schools can do much to overcome this.

State action in the schools can domitted there is universal, sincere, and unmistakable sympathy with the men whose voice is now beginning to prevail in the Sultan's councils, and with the efforts they are making to substitute order for chaos and an intelligent and honest administration for a system of corruption and hard-grained indifference to the welfare of the people. The English friends of young Turkey are hopeful also of the future, and it is to the interest of this country that the Sultan's dominions should be under a strong, honest, and benevolent Government. It is for this reason and not with any misgivings about the rectitude of our intentions or the security of our postion in Egypt that scress is laid on the imperative urgency of internal and domestic reforms. When the fiftnances of Turkey have been placed on a proper footing, when something better than a precarious truce is established in Macedonia, when justice is administered impartially to every class of the Sultan's subjects, when a beginning is made towards exploiting the country's resources for the benefit of the people and not the court favorites and foreign company promoters, when Turkey in fact shows signs of becoming a compact and progressive nation it may be time to talk of external territories which have in one way or another poen rescued from Palace misrule.

OFFICIAL RECEPTION **GIVEN TO ENGINEERS**

Charming Scene Witnessed in the Parliament Buildings Last Evening

The visit to Victoria of the Camadian Institute of Mining Engineers and their guests came to a close last night with a reception given in their honor at the Parliament buildings. The big grey pile across the bay was thrown open to the visitors last night and illuminated from end to end. Over the main entrance was a large crown picked out in electric lights, while the arch itself was emphasized with a quadruple row of lights. Inside the building every preparation had been made, and the handsome structure was looking its best-Its natural beautles are such that it does not require a great deal of decoration to produce a very beautiful effect, and the legislative chamber in which the reception was held was accorded an universal meed of admiration. The decorations at this point were simple but effective. The carved oaken screen behind the speaker's chair was draped with two large Union Jacks, while in the intervals between the pillars of Italian marble there depended from the galleries festoons of flags and bunting. Round the room in rows and groups were masses of plants and flowering shrubs which lent an added touch of color to the handsome chamber, the whole producing a most charming and picturesque effect.

The inside of the lofty dome was also illuminated with a row of lights high up near the top, and other lights at the angles of the walls at the various landings and at intervals between. On the ground floor a long table was set, laden with all kinds of good things for the inner man. The board liself was tastefully decorated in front, while the recommodation of the ladies.

The reception began at 9 clock, and whether the electric light system

chairs for the accommodation of the ladies.

The reception began at 9 o clock, and whether the electric light system was temporarily overloaded, or whether from some other defect, is not known, but anyhow the lights went suddenly out throughout the building. Fortunately but comparatively few of the guests had arrived and these were piloted upstairs by the dim lights of candles hastily requisitioned from the recesses of the basement. Fortunately the electrician was soon able to remove the cause of the trouble, and no further contretemps of the kind were experienced, although a number of candles were kept burning in case of accident.

The guests were received in the promise.

of candles were kept burning in case of accident.

The guests were received in the legislative chamber by the Premier and Mrs. McBride, the Hon. Dr. and Mrs. Young and the Hon. Dr. M. Eberts, K. C., speaker of the house, and Mrs. Eberts. There was a large gathering present besides the visiting engineers, and the ladies of Victoris, turned out in the way they always do on such occasions, and the many handsome costumes and flashing jew-cls rendered the scene fully worthy of an official function at the capital of the great Pacific province.

Proceedings Informal

Proceedings Informal

Proceedings Informal
The proceedings were quite Informal, the guests chatting together or wandering over the building, which was thrown open for the evening, the while a stringed band led by C. A. Rumsby discoursed sweet music in the mosaic tilled lobby outside the chamber. Shortly after ten, on a signal given by the Premier, the party made their way downstairs to the supper hall, where a dainty light refection had been provided, to which ample justice was done.
The thoughtful act of leaving the museum open was much appreciated by the visitors, many of whom avalled themselves of the opportunity to inspect the splendid collection of the flora and fauna of the province, as well as the Indian relies. They were much interested, and said many appreciative things of the care and skill displayed in its collection and display.

At 11 o'clock all was over, and a

displayed in its collection and display.

At 11 o'clock all was over, and a few minutes afterwards the lights were turned off, and the big building once more in blackness. The guests wended their way back to their hotel, much pleased with the graceful courtesy thus accorded them by the government of British Columbia, a courtesy which was carried out in a manner eminently creditable to those responsible for its inception.

This morning the visitors leave for Nanaimo, and after visiting some of the mines there, and possibly the Tyee smelter, they return to Vancouver by the steamer Joan, where they spend a day, and then start back on their long return journey over the main line of the C. P. R.

months, while during the second outburst of rain, hall fell for about a quarter of an hour, covering the streets and sidewalks with an icy covering. On the plank walk leading to the Driard the hall did not wholly melt for something like 30 or 40 minutes. As old residents are well aware, lightning and thunder are comparatively rare in this province. About two o'clock the skies cleared and the rest of the afternoon although rather cool was very bright and agreeable. The night was clear with all the stars in their usual and proper places.

Former Victorian Returns

Former Victorian Returns

Mr. J. A. Cameron, an oid resident of Victoria, and at the present time proprictor of the Fairfield hotel in Seattle, arrived in town yesterday and is putting up at the Dominion. He states that he will leave in a couple of days for Edmonton, in Alberta, in company with four or five gentlemen from Minneapolis, who have been on this coast, and staying at his hotel during the past couple of months. These people will spy out the country with the view of effecting very considerable purchases of land if the prices and the conditions suit. One thing has at last become beyond all manner of doubt, that if the vacant lands of the Northwestern territories are not occupied by Canadlans and people coming from the old country they will assuredly fall into the possession of Americans, as the tide of immigration from that quarter is increasing in strength and in volume daily.

INTERESTING TRIP OF MINING ENGINEERS

Most of the Larger Mining In-dustries of the Dominion Are Visited

The visit of the Canadian Institute of Mining engineers to British Columbia is the result of a great deal of thought and planning on the part of the executive. The idea originated two years ago in the mind of the secretary. thought and planning on the part of the executive. The idea originated two years ago in the mind of the secretary, H. Mortimer Lamb, as a good way of removing or helping to remove the stigma which has to some extent laid upon Western Canadian mining propositions since the unfortunate results of a number of itotations perpetrated on the London market during the boom days of Rossland and the Slocan. The British investor was bitten on a number of occasions, and it was desirable to show to those whose testimony he would trust that there are plenty of large and successful enterprises being conducted in Canadian mining camps. The matter was discussed by the executive council of the Institute last year, and it was decided to make the venture. The Dominion government was then approached, and support was secured from Ottawa. At first the idea of a western trip was discouraged on account of the stack times due to the fall in copper. But later on things brightened up, and the grant was forthcoming. The institute then wrote to the leading societies of England, France, Belgium and Germany asking them to send one or two representatives as the guests of the institute, and as many more of their members who cared to take advantage of the special rates which would be obtainable. At first, it seemed that more would come than could comfortably be taken care, but the term in mumber were unable to make the trip, and about forty Euromide.

of, but later a number were made to make the trip, and about forty European engineers arrived.

Discussing the trip at the Empress yesterday evening, Mr. Lamb said:

"We assembled at the Chateau Frontenac, Quebec, where we were received by Sir Lomer Gouin, the premier of Qubec, the mayor of the city and the Hon. Mr. Devlin, the minister of mines. Our first excursion was a trip down to see the Quebec bridge, and then we visited Sydney, where we spent three days. There we went through the works of the Dominion Coal Company and the Dominion Steel Company, and other mines.

"Our next point of interest was the asbestos deposits. We saw a number of the mines, of which those belonging to the Bell Company are possibly the largest. These asbestos deposits are most remarkable, and supply \$5 per cent of the world's supply. We learned there that they intend in the near future to manufacture the asbestos on the spot, and they expect to get a large market in the northwest. They are going to make asbestos boards and shingles. These will not cost much more than those now used, and will be absolutely incombustible, besidess making a cool house in summer and a warm one in winter. The mines are paying large dividends, and it is not generally known that for the past few years, the mines in the Eastern Townships of Quebec have been yielding larger returns in proportion to the cof Canada.

larger returns in proportion to the capital invested than those in any part of Canada.

"From there we went to Toronto and so down to the Ningara Falls, where in addition to the ordinary sights, we were taken through the power plant by the manager, and thus saw many interesting sights that otherwise we should not have witnessed.

"Cobalt was visited, of course, and the immense richness of some of the ore bodies was a surprise to many of our guests. Among the mines we visited, were the Lawson and Crown Reserve, where some of the drifts we traversed were literally floored with polished silver. Such a showing of native silver has probably not been seen anywhere before. They are just starting to concentrate the lower grade ores in Cobalt. Formily nothing was shipped that went less than 50 ounces in siver. The camp is now paying profits of about \$750,000 a month.

"The nickel mines at Sudbury were visited as were the Moose Mountain iron mines belonging to Mackenzie & Mann. These have a very high grade ore, and contracts have been made with the smelters to supply an ore carrying not less than 55 per cent. metallic iron.

"Approaching British Columbia we left the train and saw the Frank left."

on all sides, the manager, Mr. Hodges, halted us at one of the stopes. He told us how wide it was and how it reached down so far that they had encountered the devil. At that a red light shone forth and at the bottom of the workings appeared a most formidable fiend, complete with horns and hoofs. He made a threatening gesture and the drilling began. Suddenly a button was pushed somewhere and there was a loud explosion, and his satanic majesty vanished in smoke and dust. It was a very clever and unexpected realistic display, and was received with loud applause. After a luncheon at the mine we were taken through the huge smelter at Grand Forks, and the next day was spent in

Office, Broughton street,

Nelson. This was a thoroughly enjoyable day after the strenuous time we had been having. We had a luxurious and leisurely trip up the lake to the Blue Bellmine, where we were met by the manager, S. S. Fowler. It is a low grade zinc and lead proposition, but they seemed to have solved the problems of treatment and to be on the way to a remarkable success. On our return we had an excellent dinner on the boat, followed by a little speechmaking.

on the boat, followed by a little speechmaking.

"From Nelson we came through to Victoria, where we are having a little holiday." This morning we had a session at the Parliament Buildings, but in the afternoon there was the garden party. Tonight we are amusing ourselves as we think best, and tomorrow we propose to put in quietly until the reception in the evening. On Thursday we go to Nanaimo and from there we return to the east. We are to spend a day at Banff and visit the Bank Head mines en route.

"The Institute and its guests owe a great deal both to the LC.R, and the C.P.R. We have been magnificently treated, and splendidly looked after all along the route. Our object in bring-large way to the course of the large of the proposed of the

along the route. Our object in bring-ing out our European friends was along the route. Our object in bringing out our European friends was largely to show them some of the unique mineral resources of Canada. We showed them the big things, some in each province, and I think we succeeded in our object. Those who had not visited the country before expressed themselves as astounded at the showings of the mines. They know now from personal observation something of what we have, and I feel sure that they realize that Canada has immense mineral resources which only require adequate exploitation."

NEED OF INDUSTRY IS MORE POPULATION

Hugh F. Marriott Explains How Capital Regards Mining Propositions

Hugh F. Marriott, head of the mining department of the world famous mining firm of Wernhier, Belt & Co., is one of the guests-of the Canadian Institute of Mining Engineers, and it is Marriott's first visit to Canada. When asked to give his impressions he hesitated to say much, especially as he has promised to address the Canadian Club at Vancouver on his return. However, ile-had some interesting observations to make on the requirements of the mining industry from the point of view of the big capitalist.

Speaking generally he said:

capitalist.

Speaking generally he said:

"One of the things that struck me most was the able way in which the country had been mapped by the government. There has been a great deal of good work done by the goological survey and others which should be of great assistance to those who wish to explore in an intelligent manner. I don't think that I have seen as good work done in any other country that I have visited.

"Speaking from a mining point of

country that I have visited.

"Speaking from a mining point of view, I think perhaps that your greatest need is more people. We have been shown some splendid things, and in such a vast mineralised area as yours there must be others, but it requires plenty of people to find them. A hundred pairs of eyes discover what two or three pairs will overlook.

"There is also another thing which

ore, and contracts have been made with the smelters to supply an ore carrying not less than 55 per cent. Metallic iron,

"Approaching British Columbia we left the train and saw the Frank silde in western Alberta, then crossing into British Columbia we visited the International Coal company and the International Coal creek. We had had a very strenuous day and when we reached Fernie we were quite played out. However, Mr. Lindley had got up a smoker for us and insisted that we should attend. We did and forgot our fatigue. Mr. Lindley showed himself to be a most entertaining host, and we had a most entertaining host, and the experience can have any entertaining host entertaining ho

did and forgot our fatigue. AIT. Linder ley showed himself to be a most entertaining host, and we had a most entertaining host, and a cannot afford to develop it himself, he should form a small syndicate when how mines that are brought the concentrating mill. Then we went on to the power plant at Bonnington follows, where we arrived about 11 at hight. Everything was read as clean as a lady a critical plant caused a great deal and favorable comment. At 7 am. we were en route again and went through the Trail smelter, afterwards going up to Rossland and where we were taken through the Le Rol mine, the Rol Mo. 2 and the Centre Star. The mines appeared to be in splendid shape, and we were informed that rich ore reserves had been discovered at the lower levels. In the evening we were tendered a splendid banquet, "From Rossland we went to Greenwood and examined the B. C. Copper Co's smelter, whose arrangements and labor-saying devices evoked much favorable comment. It was pronounced to be one of the most economical smelters in the world. We then went down the world world to the more of the book shape to the most economical smelters in the world. We then went dwondered at the immones wails of ore on all sides, the manager, Mr. Hodges, halted us at one of the most economical sides, the manager, Mr. Hodges, halted us at one of the stopes. He told us how wide it was and how it reached down so far that they had entertained by the defendant in favor of the defendant in the case of Brownell vs. Hr. Mrs. Brownell was suing her husband, and down and under a manager was a find cannot afford to develop it himself, he should form a small syndicate with those where he

NAMES MENTIONED FOR ARCHBISHOPRIC

No Nomination Made By the College of the Cardinals

There were three candidates for the Archbishopric of Victoria, when the congregation of the propaganda for British Roman Catholic affairs met recently at Rome, one being a British Columbian, Rev. Father Nicolaye, of Ladysmith and formerly of Victoria. Those present were Cardinals Gotti, Vives y Tuto, Segna, Casetta, Gannari, Satolli, Cavicchioni and Martinelli, and after a discussion of the situation arising out of the resignation of Archbishop Orth of Victoria, it was decided to transfer the seat of this Archbishop to Vancouver and to recommend to His Holiness the Pope the appointment of Mgr. MacDonald, vicar-general of Antigonish as Bishop of Victoria. Monsignor Gabriel Bregnet, Apostolic Vicar of MacKenzie, supported by Mgr. Sbaretti, Apostolic Delegate to Canada, requested the propaganda to transfer the ecclesiastic province from Victoria to Vancouver, and after a report had been made by Cardinal Casetta this transfer was approved of and Mgr. Dontenwill was appointed Archbishop of Vancouver, while Mgr. MacDonald will be Bishop of Victoria.

A subsequent report from Rome states that His Lordship, Archbishop Dontenwill, has been appointed superior-general of the Order of Oblates of Mary Immaculate, a life appointment which necessitates his residence in Rome. This will probably necessitate the appointment of another Archbishop for Vancouver.

Bishop Dontenwill was born in Alsace, formerly a French department, and now a part of the German Empire, about fifty years ago. His ordination as a Roman Catholic priest took place in Eastern Canada twenty-three years ago. After holding a professorship in Ottawa university, a seat of learning directed by the Oblate order, he was appointed coadjutor bishop of the diocese of New Westminster in 1897. Two years later he was appointed the doc of the diocese.

The Oblate order devotes itself primarily to missionary work. It has establishments in nearly every country of Europe as well as in Asia, Africa, the United States, Australia and the Dominion. Its intrepid missionaries we

TO FORSAKE KANSAS

American Farmer Finds Canadian Pur

American farmer Finds Canadian Purchase Good Investment

An American farmer who came out to this province from Kansas, states that this is by no means his first visit to Western Canada, as he was in the Northwest territories first seven years ago. He, moreover, at that time purchased a full section, or 640 acres, of land, at the rate of \$6 an acre, or \$3240, while he had had the gratification of being offered for it when he revisited its location no less than \$22 an acre in cash, or \$14,080, But he had not the slightest idea of letting this property pass out of his hands. In point of fact he thought he would shortly move from Kansas, and take up his permanent residence upon this very considerable block of land, for it is a mile square. And moreover, he added, a number of his neighbors would likely follow his example, as they had been having a rather miscrable time of it in that State during the present year in consequence of extraordinarily heavy rains and serious floods. It will likely have been also noticed that the States of Texas and Georgia have suffered severely from the same cause during the present summer. This American also inspected the Okanagan valley lands.

DEFENDANT WINS IN NOTED DUNCANS CASE

Justice Martin Hands Down Judgment in Brownell vs. Brownell

Mr. Justice Martin yesterday handed down a judgment in favor of the defendant in the case of Brownell vs. Brownell. It will be remembered that Mrs. Brownell was suing her husband, a blacksmith and rancher of Duncans, for an accounting of the money she claims to have given him while they were living together as man and wife. Her story was that he suggested that she should work at her trade as a dressmaker and he at his as a blacksmith, and pool the results, which he

continue.

Mr. Justice Martin's judgment follows:

"In view of the fact that both counsel informed me on the application to amend the pleadings, and it was repeated by the defendant's counsel at the trial, that an action for divorce is pending in this court between the parties hereto, I think it advisable to express my opinion on the present case as briefly as possible, because some of the unhappy differences between this couple will doubtless be reviewed in the other action. Therefore it will be sufficient to say that after giving due effect to the evidence of all the witnesses who appeared before me I can only reach the conclusion that the plaintiff has falled on the facts to make out any case for rellef, quite apart from the objections in law which were advanced in answer to her claims, and which it is therefore unnecessary to discuss." Judgment will consequently be one."

to discuss.
"Judgment will consequently be en-tered for the defendant, with costs. (Signed) ARCHER MARTIN, J." Victoria, B. C., 23rd September, 1908.

Woman's Realm

HERE AND THERE

The action of the Woman's Council in prevailing upon the school board to introduce domestic science into the schools has been more than justified. The laddles supplied the equipment required to start the school. The school board was fortunate in their choice of a teacher. From the first the little girls who form the class have taken great delight in their work. It is a pleasant sight to see the children in their spotless white aprons and caps baking, cooking and cleaning. Many older housekeepers would benefit by the instructions given to the class on the value of foods and the best way of preparing them. No lesson is taught which is not put into practice. This is one of the reasons why the domestic science class is so popular. science class is so popular,

None of the girls who work with Miss McKeand will think that the duties of the housekeeper are in any way degrading to the daintiest or the most intellectual woman. They recognize that it requires brains to select the food and prepare it for the table. Nowhere is the awkward, thoughtless, stupid girl more at a loss at first than in the domestic science class, but nowhere will she learn more quickly how to remedy her defects. The training received here is of value, not only how to remedy her defects. The training received here is of value, not only in after life in the home but in the other branches of the work of the school. Many a girl who has been looked upon as hopelessly stupid at her books has in the domestic science class found out that she possessed ability both of head and hand. The confidence thus gained is of the greatest help to the pupil not only in her school days but throughout her whole life.

Yet it is not only in her habits and character that the training received from the domestic science teacher is valuable to a girl. There is no woman whatever her occupation, who will not at some time in her life require a knowledge of cooking. This is never so well learned as in youth. To know not only how the work of the kitchen should be done but to be able to do it quickly and thoroughly is an accomplishment more useful, in the great majority of women than any other they can acquire in school. It is very important that a girl should realize that she can be at the same time proficient in literature and mathematics and mathematic

ters of people in moderate circuinstances from doing their own work or, what is almost as bad, thinking it a hardship that they should be obliged to do it, and which makes domestic service so much disliked by the mainstances from the high school carries away with her a diploma for excellence in the art of household management, the servant problem will be in a fair way to be solved. In our own schools, at present, the instruction does not go far enough. When a girl enters the high school she must lay aside her cap and apron as if a knowledge of French, Latin or mathematics, were inconsisterly with the ability to cook a dinner. The consequence is that much that has been learned is forgotten before the girl's education is finished, or rather, that after she leaves school she must resume that branch of her education which to every mistress of a home is indispensable.

But the accommodation afforded by the schools of the city is not enough even for the girls in the common schools who are old enough to take, advantage of it. There is only one centre, that at the Central school, and many of the girls have to await their turn to take their places in the class, of the manual training school. In ters of people in moderate circum-stances from doing their own work or,

branch of her education which to every mistress of a home is indispensable. It is the schools of the city is not enough even for the girls in the common schools who are old enough to take advantage of it. There is only one centre, that at the Central school, and many of the girls have to await their turn to take their places in the class. The consequence is that not all of the girls can complete even the limited course before entering the high school. In a town of this size, there should be at least two centres as in the case of the manual training school. In making plans for the erection of the new school at the North Ward the trustees should bear this fact in mind and make suitable provision for another domestic sclence class. The mothers and fathers of Victoria will gladly bear the expense necessary for so important a part of the education of their daughters.

All the larger etties of Canada today

complishment more useful, in the great majority of women than any other they can acquire in school. It is very important that a girl should realize that she can be at the same time proficient in literature and mathematics and skilled in the arts of housekeeping. There is a tendency to look down on the necessary labor of the household as menial. A girl who can spend hours he reself ill-used if she is asked to cook a dinner, scrub a floor or to do a fore-

moon's washing, although the exection which she puts forth at play is far greater than such work would require.

It is this tendency which, to a great extent, prevents the wives and daughters of people in moderate circum-

Whither or not these people should be here, it is not ours to decide nor have we anything to do with the future. We must see to it, not only that we ourselves treat these aliens with kindness, whenever we are brought into contact with them, but we must teach our children to refrain from hurting them by word or deed. If this were not necessary for their sakes, it is for our own. Hatred and malice should find a home in the heart of no woman or child. In the midst of much that is perplexing this much is sure. Women of Victoria, no less than the women of other cities of Canada can, if they will, do a great work for the country by promoting goodfeeling between all its people.

HOW TO WASH TAFFETA

suds should be made, and the soap itselt may even be rubbed directly on greasy spots, but as a rule, especially if the color be deficate, soap should not be applied directly to the silk. The garments should be allowed to lie about five minutes in the sudes and then be gently squeezed and pushed up and down in the water, shaken out and put back again. Another suds should be prepared, into which the garment should go and the former procedure repeated, save that three minutes are enough to leave the garment in the suds before squeezing.

After this second suds the silk

suds before squeezing.

After this second suds the silk should be rinsed in three different luke-warm or cold waters without squeezing, and be taken out and hung dripping in a shady place until dry enough to press with a mederate hot iron. The iaffeta should always be pressed on the wrong side, and lined taffeta frocks should therefore go to the cleaners. Of course something can be laid over the face and the silk pressed, but this is never satisfactory. Unlined taffetas of standard colors in good qualities are the ones that bear wassing. Dark onat bear washing Dark blues, reds and blacks wash the best, Brown is always a tricky color, and greens are no better. Grays launder beautifully in good silks.

wide to outline any of the drapery.
The idea is quite effective when colored satin pipings are used on white or ecru transparent frocks.
One gown for a debutante has white filet tulle which is quite coarse and not perishable, has a tunle and shoulder draperies piped with four inches of light green satin.
The mistake is not made of lining this frock with green. It is dropped over white liberty satin, the edge of which is bound with green.
This latter trick, by the way, is a good touch to remember. Any lining that is light can carry a border of colored satin to correspond with the color scheme of the frock.
It is also a good touch to bind the plaiting on a taffeta underslip with two inches of floss to match the skirt. This keeps the silk from wearing out when rubbing over the shoe leather.

Materials for Wintar The presbytery of Philadelphia about a year ago established a school for deaconesses and now Chicago has established such a school. It has been felt for a long time that women should be educated for church work, the Presbyterian and other churches coming to the same conclusion. The deaconesses are new to the Presbyterian church in this country, but not abroad.

The Sporting World

Looked For This After-

The first day's programme of the annual exhibition meet was brought off under difficulties. Because of the rain it was not possible to bring out the harness horses for the initial contest, harness horses for the initial contest, a gentlemen driving event, distance one mile, until about 3 o'clock—one hour later than the scheduled time. When Judges D. E. Campbell, G. A. Fraser and J. E. Miller decided to call for the events in the order advertised and the gong was sounded the track was exceedingly heavy, in fact, in places, it was nothing but small puddles and inches of mud. The crowd which filled the grandstand, however, was indulgent. The circumstances were understood and, apparently, appreciated and no audible murmurs of discontent were heard on account of the delay.

shelagh to Fore
The second heat followed after the usual intermission. In it there were the same entries. This time Samson was a favorite, it being the consensus of opinion that he would be able to defeat his rival after his splendid finish. But those who so placed their money were bitterly disappointed. Shelagh came to the front on this occasion. She stepped out in great style from the post and maintained a steady pace which brought her first to the line. Close behind was Victoria Girl. Dr. Humber's mare. Third place was taken by Samson. The result had no sooner been announced than there was an uproar. Pedro's driver, Mr. Taylor, was peered by the excited throng. Cries of "rotten" were directed at the judges when they announced that "all bots were declared off." This action, it was explained, was taken because it was felt that Pedro hadn't been given a fair show. The time was 2.54.

Her und mast victory with midthe ase, Once again she reled of the minished been them with machine-like steadinese. Samson and Victoria Girl in the order named. The time was 2.52 3-4.

Five thoroughbreds appeared to participate in the Visitors' purse, distance one-half mile. They were E. C. Runte, owner McGrey D. Riley: Dainty Morsel, owner McGrey, Jockey Sullivan; Max, owner Nanton Raneh, Jockey Sullivan; Max, owner Manton Raneh, Jockey Sullivan; Max, owner Manton Raneh, Jockey Sullivan; Max, owner Manton Sulling and an announce that the word. HORSE SHOW PROVES FEATURE OF WEEK

Second Evening Sees Larger Attendance Than Ever at Popular Function

The second night's performance at the Horse Show, an event which is now acknowledged as the premier attraction at the fair, proved a great attraction to the horse-loving public of Victoria. When the first class entered the ring to be judged there was a large andience present, the success of the first evening's events having proved a true indication to the merit of the show and the quality of the horses exhibited. While the boxes were hardly as well filled as on the opening night, this no doubt resulting from the inclement weather, following the rain of the afternoon, the balance of the pavilion was crowded to its limit with an enthusiastic and applauding erowd which showed its keen appreciation of the merits of the various entries by liberal applause when the awards were distributed, Following the excellent rule established, the show was started promptly on time and each class was in the ring almost on the Instant. The experience gained during the first night's performance proved a valuable one and the many spectators were allowed to wend their way homewards at a much earlier hour than was the case on Tuesday evening. The same excellence in the various entries as was shown on the initial performance was repeated last night. class there were numerous

In every class there were numerous entries and while in one or two a number of the exhibitors failed to make an appearance, and left the honors to one entry, the quality of this one was such as to merit the commendation of the audience.

As was the case on the opening night the jumping classes were productive of the mounts and the horsemanship of the riders appealing to the audience which was not at all backward in giving its appropation to the winners. The judges had a hard task in choosing the winners from among the many entries of quality and prac-

More Light Provided

Attention had been paid to the lack of necessary light and the trouble from this source experienced on Tuesday evening was last night conspicuous by its absence. Additional lights had been put in, and acytelene lamps were also requisitioned to add to the brilliancy of the seene. The exhibitors had also apparently appreciated the necessity of having their entries ready when the class in which they were entered was called, and there was less of the annoying delay that was the case on Tuesday evening.

Sharp at 8 o'clock the first class was judged, the heavy draught horses, a class which is remarkably well represented with animals of the very first quality. To the Inverholme Stock Farm went the first honors, their entry, "Prince" and "Rose" being awarded the blue ribbon, while the other entry, that of James Richards, Victoria, was given the second place, his "Prince" and "Sandy" being but a close second to the winners.

"Prince" and "Sandy" being but a close second to the winners.

To D. E. Krederick, of Seattle, went the first prize in the single trotting horse class, his being the only entry, and his horse "Lygnors" fully merited the honor of the blue ribbon. The heavy harness class of drivers was well represented so far as quality was concerned by the entries of David Spencer, Ltd., of Victoria, and Victor S. Spencer, of Vancouver and S. R. O'Neal, of Vernon, were also entered. It required considerable time before the first award was granted to "Comox" and "Nelson," the handsome entries of W. S. Holland. The appointments in the case of each of the entries were of the highest order and the style and appearance of the turnouts was heartily commended by the audience.

The ladies' saddle horse class was represented by seven entries and probably this one class excited more interest than all the others. The riders showed themselves to be thorough horsewomen, thoroughly acquainted with their mounts and as an exhibit

of horseflesh the class was probably one of the best of the evening. To Mrs. Loewen, on "St. Louis," a handsome bay gelding, went the first prize to be a support of the best of the evening. To Mrs. Loewen, on "St. Louis," a handsome bay gelding, went the first prize to the honor was stubbornly disputed by "Redskin" ridden by Miss Pooley and it required several turns about the ring before Judge Spark could finally decide to whom should fail the blue ribbon.

The hunter class was also a favorite with the audience. The exhibition of jumping was fully equal to that given or Tuesday evening and certainly the audience appeared to appreciate it even more. D. T. Tees, on "Golden Crest," which won high honors of the opening evening, again carried off the blue ribbon, his jumping being easily better than his competitors, due, without doubt, to the skifful manner in which he handled his mount. That the lorse has talent a-prenty was easily apparent but Mr. Tees, who is a vettern horseman and one who can get all there is out of his mount, contributed in no small measure to the victory marked up to "Golden Crest." B. Williams, the local entry, was unfortunate in that his mount, "Frank L," stubbornly refused to take the hurdle and after three endeavors to bring his horse over the brush, Mr. Williams was forced to desist. "Summerland," ridden by Miss Smith, of Vancouver, and "Marcella," an entry made by Miss Payne L. Sum, of Victoria, were all highly commended and their exhibition of jumping was thoroughly enjoyed.

Not the least important feature of the evening's entertainment was the exhibition made by the team of grays from the central fire hall. The intelligence displayed by the horses in answering an imaginary alarm and the despatch with which they were hitched to a hose wagon was ample

the evening's entertainment was the exhibition made by the team of grays from the central fire hall. The intelligence displayed by the horses in answering an imaginary alarm and the despatch with which they were hitched to a hose wagon was ample proof of the efficiency of the local brigade. The exhibition was loudly applauded.

During the evening Mayor Hall addressed the audience, asking that this afternoon be observed as a holiday by every citizen. His worship explained that owing to yesterday's rain the attendance had been much below that expected and he expressed the hope that this afternoon there would be a record crowd in attendance at the fair. Following are the results in the various events:

Class 133—Pair draught horses, each horse to weigh under 1,600 pounds, and not less than 1,300 pounds. Marcs or geldings, three years old and over, to be shown to an appropriate vehicle. First prize, Columbia graphophone, presented by Fletcher Bros. First, "Prince" and "Rose," exhibited by the Inverholms stock farm, Ladner, B. C.; second, "Prince" and "Sandy," exhibited by James Richards, B. C.; second, "Prince" and "Sandy," exhibited by James Richards, B. C.; second, "Prince" and propriate fourwheeled vehicle, horses to count 30 per cent and appointments 10 per cent. First prize, Association cup. First, "Cyonoes," exhibited by D. E. Frederick, Seattle.

Class 161—Horses in heavy harness, pairs of mares or geldings, 15 hands and over, to be shown to an appropriate vehicle and to be driven by a lady, conformation and quality to count 75 per cent, First prize, Association cup. First, "Cyonoes," exhibited by D. E. Frederick, Seattle.

Class 161—Horses in heavy harness, pairs of mares or geldings, 15 hands and over, to be shown to an appropriate vehicle and to be driven by a boy or girl under 15 per cent. First prize, association cup. First, "Trinketts," exhibited by R. Thorburn, Vancouver; second, "Sliver Tip" and "Trince," exhibited by D. and "Prince," exhibited by D. and "Prince," exhibited by D. and "Prince," exhibi

OUVER AND E Vancouver and All-Star Baseball Team Will Tour the

Victoria baseball fans may have an opportunity of witnessing some high class ball before the close of the

AT HALF TIME

class ball before the close of the season. Last night it was learned that negotiations are in progress towards arranging a match between the the Vancouver Northwestern league team and an All-Star nine formed of the best players of the five other clubs represented in the series. Whether the contemplated engagement will be close is uncertain as yet but if those back of the proposal are convinced that the aggregations mentioned will be lined up here in one or more games.

The whole project, of course, depends on the outcome of the race for the pennant. While it is a foregone conclusion that Vancouver will win, should the Beavers experience a pronounced reversal of form thus allowing one of the others to come in on the finish the present plans would be abandoned. But the Terminal City players and their manager is confident that they have the pennant cinched and so preparations for the contemplated tour are being made.

The personnel of the teams which are useless.

SECOND RACE-Seven-eightles of a mile. Purse \$150.

COLONIST FORM CHART

At post 2 minutes. Off at 3:29. Time—1:33 4-5.

Winner br. m., owned by Coffee. Start fair, won easily, second and tving. Em and Em went to the front from the start and maintained oughout, finishing fast and an easy winner.

Glpsy King, fancled by ent two lengths behind the leader.

KUMERIC ARRIVES FROM THE ORIENT

Weir Liner Had Stormy Passage Across Pacific From Japanese Ports

WRECK OF THE DUNEARN

Further Details Brought of Disaster-Sharks Took Some of the Victims

After a stormy passage, steaming against heavy gales, accompanied by heavy seas, the steamer Kumeric, Capt. Cowley, of the Weir line, reached port yesterday from Manila via ports of China and Japan with forty-two steerage passengers and 6,000 tons of general cargo, tea, hemp, rice, porcelain, matting, curios, etc., and including 1,000 bales of silk and silk goods valued at \$600,000. There was, too, one saloon passenger, an Australian bound saloon passenger, an Australian bound to Helvetia.

If you ask anyone on board the Ku-meric about the stormy passage, from captain to second cook, all will tell the same story—it was due to the second officer forgetting to pay his dhoby? wash bill at Yokohama. Any old sailor knows that an unpaid wash bill means a run of stormy weather and other happenings, this being second only to the shooting of albatrosses in bringing bad weather down upon a steamer.

Gales Encountered

Gales Encountered

Soon after leaving Yokohama the Kumerle ran Into strong northeast gales which continued with northeast and easterly storms until the longitude of Akatan was reached, and thence strong head seas and head weather was experienced. On Saturday last the barometer fell lower than Capt. Cowley of the Kumerle has known in twenty-five years sea experience—to 28.55. There was little or no wind then, but soon squalls started from the southeast, and the wind, veering to the southeast, and southwest, and in a few south and southwest, and in a few hours a hurricane was blowing with a velocity of 70 miles an hour. The Kuperic ran before the gale with heavy eas breaking inboard, water showering over the rail, but no damage was didly, thanks to the skill and seaman didly, thanks to the skill and seaman-ship of the master. The winds con-tinued strong until arrival off the coast, where, off Race Rocks, a whale was seen with a long scar and the chief officer swears it was the same whale that was seen at Tacoma last voyage, having seemingly come over to wel-come the liner.

The second mate's wash bill and the yen and a half to pay it has been for-warded by first mail in the hope of preventing further storms following

the vessel. The Kumeric had a unique installa-tion of wireless apparatus. It is an invention of Second Engineer Reed made of what scrap he could secure. His battery is in an old pickle bottle, his instrument is home made, the mo-tor taken from a small power boat and everything from the aerials rigged to the jumper stay, to the sender and telephones which he fastens to his car to listen for signals is home made. He telephones which he lastens to his ear to listen for signals is home made. He has had some success on board the ship and at short distances, but efforts to communicate with the Pachena sta-tion inbound were not successful. With more material than he could secure on to greatly improve his apparatus and the Kumeric will probably be able to report her coming on the next trip.

The steamer brought 108 tons for his port and after discharging at the uter wharf proceeded to Tacoma at

Dunearn's Loss

Further particulars than were cabled of the loss of the steamer Dunearn off Goto island, near Nagasaki, when bound from Vladivostok to Singapore with a cargo of 4200 tons of. coal, were brought by the Kumeric. Of the crew of 53, but three men were saved, being picked up after clinging to wreckage for twenty-four hours while sharks swam waiting for them to drop off, by the Japanese steamer Salkyo Maru. The survivors, William Phipps, 24, third officer, and John Loudon, 22, fourth engineer, stated that the steamer ran into a typhoon and sank within three minets, water pouring in through open. typhoon and sank within three minutes, water pouring in through openings broken in the coal bunkers. Considerable wreckage was seen by officers of the Salkyo Maru, where the
two survivors were found, but no sign
of life. Sharks had to be driven
away before the two men were picked
up. A seaman and a stoker clung to
the wreckage with the two survivors
but became exhausted and let go, being seized by the following sharks.

From China news was brought that

Ing selzed by the following sharks.

From China news was brought that the government has agreed to the proposals of Tang Shao-yi, who is being sent to Washington to thank the American government for remitting the Boxer indemnity. These are that 100 Chinese students be sent yearly to the United States during the next five years.

From Toklo news was brought of great indignation meetings being held to protest against the postponement of the exhibition for five years and the Tokio city council has made claim for damages, demanding a return of three-quarters of a million dollars expended in preparations. Proposals are being made that the city take over the exhibition.

VADSO BRINGS NEWS

the steamer Amur on River's Inlet, and will sail today, permanent repairs being deferred for a time. Two plates were damaged, both above the waterline. The collision occurred at night in River's Inlet when the Vadso was bound down and the Amur bound north, the C. P. R. steamer ramming the Boscowitz Company's vessel, and when she hit the Vadso with her stem, two plates were damaged. The collision occurred at 3 a. m., and the shock was quite heavy, some of those on the Vadso being thrown from their feet. Among the passengers brought south by the Camosun were: Miss J. Wallace, Miss C. Wallace and Mr. Wallace, jr., of Claxton; J. Mitchell, S. S. West, Mrs. West, Mrs. Noot, D. McArthur, C. Brindlesen, Miss Howson, F. Dutcher, Miss Thorsen, H. Manson, G. Hicks, Mr. and Mrs. J. Wallace, Mr. Martin, A. Pitts, Mr. Hucking, S. Miller, Mr. Philen, Mr. R. Williamson, D. Kergin, Mr. Gürdüle, J. Shand, N. Pokoy.

When the Camosun sailed north again last night, she carried a fair amount of general freight from this port, and the following passengers: H. Rano, J. Dahl, Rev. W. E. Collison, J. Mason, R. Brown, for Prince Rupert, and L. Hind for Hartley Bay. the steamer Amur on River's Inlet, and

NEWINGTON BRINGS PARTY OF CAPITALISTS

Wealthy Timber Owners Returned From a Visit of Inspection to Logging Camps

The steamer Newington, Capt. Shadforth, was in port yesterday morning from northern coast points, bringing $\boldsymbol{\mathfrak{u}}$ number of capitalists interested in timber limits and logging camps on the ber limits and logging camps on the northeast coast of Vancouver Island from a tour of inspection. The party on board the former trawler included Edward Swift, the well known packer from Chicago and wife, Edward Tilden, of Chicago and Mrs. Tilden, R. J. Mc-Rae and wife, of New Westminster, T. S. Darling and wife, of Winnipeg, U. S. Senator Peter Johnston, of Chicago, and A. D. McRae, of New Westminster. The party has been at Valdes and Reed Island, where the company's logging camps are located. The Newington left New Westminster on Saturday and proceeded to Comox, from where the party drove to Campbell river, and drove over the timber limits in that vicinity, afterward spending a day fishing at Campbell river. Then Valdes and Read Island logging camps were visited and the party returned to this city, arriving yesterday morning. She left at 1 p. m. for Anacortes with the party. Returning to New Westminster the steamer will take some logging engines to the Nimpkish river logging camps. northeast coast of Vancouver Island

fishing at Campbell river. Then Valdes and Read Island logging camps were visited and the party returned to this city, arriving yesterday morning. She left at 1 p. m. for Anacortes with the party. Returning to New Westminster the steamer will take some logging camps.

BIGGEST OIL SHIPMENT

Bellerophon Will Take Over Five Thousand Barrels of Whaleoil to Glasgow

On the steamer Bellerophon of the Blue Funnel line which will sail for Liverpool and Glasgow via the Orient and Suez canal about the end of the month the Pacific Whaling company will make the largest shipment of oil sent since coast whaling was begun on the British Columbia coast. The shipment will total over five thousand barrels of whale oil. The steamer Otter of the C.P.R. left last night with faull cargo of coal, barrels and supplies for the Pacific Whaling company and will bring 4 back a full cargo of whale oil and fertilizer. The steamer Tees will also bring a large shipment on the return for the coast.

The Chilian bark Belfast, Capt. Allegri, reached Royal Roads yesterday from Callao to which port she took a cargo of coal from Newcastle. Capt. Allegrif dld not come ashore from the Capt.

SAYS ATALANTA HAS BEEN BOUGHT

Turbine Steamer For Opposition to the C. P. R. Steamers

The latest rumor concerning the rate war is that Joshua Green, president of the International Steamship company, has announced that the turbine steamer Atalanta, of the Glasgow and South Western Railway company, is being acquired to run between Seattle and Victoria in opposition to the steamers Princess Victoria and Princess Charlotte. This the latest of a number of announcements credited to the president of the International Steamship concern, which have evaporated into nothing. First a fast steamer was, as long ago as last March, to be placed on the Victoria-Vancouver route, but no boat came; then the turbine steamer Turbinia was to have been purchased on the Great Lakes, then the H. B. Kennedy was to be bought on completion, but none of the steamers came. Now it is announced that the Glasgow and South Western Railway company's fast vessel, but two years ago, is to be brought around the Horn to fight with the faster Princesses. As the Atalanta is rated by Lloyd's Register as a 17½ knot vessel, which is but half a knot more than the speed of the "20-knot steel steamer Chippewa," as the International company's advertisement would class her, and about three knots an hour less speed than the Princess Victoria, she will not be a hard rival. The Atalanta is a small vessel of 480 tons, '210 feet long and 27 feet beam, a narrow vessel in comparison to the bigger Princesses. The report has it that Capt, Forbes, formerly of the steamer Georgia of the Canadian-Mexican line, was asked to Inspect the steamer and has reported favorably concerning her.

The new schedule of the C.P.R. went into effect yesterday when the C.P.R. steamer brought 480 passengers from Scattle and the opposition had 130. On the day previous when the Princess was laid off the Chippewa brought 339. The steamer Princess Royal arrived from Vancouver in the afternoon and left for Seattle at 3.30 p.m. Sailing an hour in advance of the Chippewa she took the bulk of the travel.

KYNANCE'S MASTER **ENCOUNTERED CURRENTS**

Capt. Auld Tells of Difficulties of Na vigation Near Scene of Acon Disaster

Capt. Auld of the British ship Kynance, now discharging at Vancouver, has had experience with the currents which run strongly at Christmas island. Last year the Kynance was on passage from San Francisco to Australia, and Captain Auld laid his course to pass Christmas island, which lays about latitude 2 and longitude 150, at 100 miles to the castward. He took his sights and had his position clearly made out and yet in one day a current set him 60 miles off his course and he passed Christmas only 40 miles away.

Sailing ships bound for Australia, get the north cast trades right down to the equatorial line which they cross at longitude 150, and from that spot run into the south cast trades and that also is the general course for steamers bound for the Antipodes. Now, from latitude 4 to 8, a strong equatorial current sets cast and runs from 2 to 3 knots an hour and this current and the sweep it takes is clearly set forth in most charts.

A navigator, therefore, getting into those latitudes and aiming to pass Christmas island on its eastward side a certain distance, will find that this easterly current is carrying him out of position.

Naturally he will attempt to correct this deviation by altering his vessel's course a point or two to the westward and under ordinary conditions this should correct the drift to the east, and enable him to pass Christmas island at the distance originally planned. Capt. Auld of the British ship Ky

But when he crosses latitude 4 in one day, according to Captain Auld, he runs out of the current setting east

TWO SAILING SHIPS ARE BELIEVED LOST

Carnedd Llewellyn and Toxteth Added to Mysteries of Cape Horn

Capt. Thomas, of the British bark Lord Shaftsbury, now lying at Esqui-mait, who halls from Newquay in Wales, has received details concern-ing the crews of the missing ships Carnedd Llewellyn and Toxteth, which are believed to have been lost. The Carnedd Llewellyn's crew included

Capt. Evan's son, and his brother-in-iaw, fellow townsmen of Capt. Thomas, amongst the crew. That the Carnedd Liewellyn and Toxteth have been added to those ships whose fates are added to the Cape Horn mysteries has now been generally accepted, both vessels being long since uninsurable at Lloyd's and will spon be posted as missing. Fifty-two lives are involved in the loss of the two ships, the Toxteth at Carrying 23 and the Carnedd Llewellyn 24 men.

On March 2 last the Toxteth left Port Talbot for Tocopila, and she was due at her west coast destination early in July, but nothing further has been heard of her, and she is now over 180 days out on a voyage which usually occupies about 100 days. Several ships which left Cardiff at the same time, and in some cases weeks after the Toxteth, have arrived out in safety and report having seen nothing of the missing vessel, and it is the general opinion that disaster has overtaken the vessel in the vicinity of Cape Horn. She is the third largest British sailing ship bound round Cape Horn this year which has never been heard of, and all three have had some connection with Cardiff, for the Palklandbank was on a voyage from Cardiff and Port Talbot for the west coast, whilst the Carnedd Llewellyn signed all her crew at Cardiff, and now the Toxteth, it is feared, has shared the same fate. Although the ship is hopelessly overdue, there is a hope that the crew may have been taken off by some passing vessel and are even now being brought home in the resculing vessel. In the event of her loss near Cape Horn the shlowereked crew may reach the coast in the Falklandbank. The Toxteth carried a crew of 26 men all told, and is, or was, an iron ship of 3,585 tons gross and 2,387 tons net register, built in 1887 by Messrs, Oswald Mordaunt and Co., of Southampton, and owned by the Leyland Shlipping Co., Ltd

Exchange buildings, Liverpool.

The Carnedd Llewellyn was on a voyage from Caleta Buena to Falmouth with a cargo of nitrate. She left the coast port on February 19 last. On her outward journey the Carnedd Llewellyn made the voyage from Cardiff to Jquique in ninety-one days, and she is now 163 days out from port. She was spoken on February 23.

The following is a list of her every.

diff to Iquique in ninety-one days, and she is now 163 days out from port. She was spoken on February 23.

The following is a list of her crew: Captain Thomas Evans, 46, Nowquay, Cornwall; Chief Officer Thomas J. Kendall, 24, Fowey; Third Officer W. H. Brenton, 21, Par; Boatswain David M. Davies, 34, Aberystwyth; Steward W. Evans, 31, 20 Jones terrace, Swansea; Cook James Johnson, 44, New Jersey; Sallmaker Thomas Francis, 66, St. David's; A.B. Christopher Christenson, 23, Copenhagen; A.B. G. Schwanis, 31, Kiel; A.B. Osman Fenrich, 21, Sallors' Home, Liverpool; A.B. Robert Barclay, 48, Limerick; A.B. Williams, 30, 21 Park street, Mumbles; O.S. Evan B. Evans, 16, New Quay; Apprentice Howard James Noakes, 15, London; Apprentice Stanley Home, Liverpool and Propentice Montague Wendt, 15, London; Apprentice Montague Wendt, 15, London; Apprentice Montague Wendt, 16, Glasgow, A.B.; and H. Simisker, 18, Sydney, A.B., left the ship at one of the ports of call—probably Iquique.

Several vessels have also had narrow escapes off Cape Horn, among them being the bark Simla. The Simla when due at Acapulco, for which port she had coal from Cardiff, put back to Port Stanley (Falkland Islands), with loss of sails, rigging damaged, deckhouse strained, and started, and the continue in command of the vessel and the owners were obliged to send out a new master to take over the command.

Smart, the secretary, states that only one of the winners on the opening day has demanded payment, namely, John Douglas, of this city, who won \$5 through holding one of the lucky numbers—4159. Tuesday's winners which have not been claimed are as follows: No. Tombola Prizes not been claimed are as follows: No. 10,098 (\$25), 64 (\$10), 4216 (\$5), 4014

AMUSEMENTS

Thrives On Opposition,

Never since the days of "Uncle Tom's Cabin" has a drama been so bitterly attacked in the public prints as "The Clansman." The ability of the playwright, Thomas Dixon, jr., and the thrilling nature of the scenes have been dealted; but flarre objection have the thrilling nature of the scenes have been admitted; but fierce objection has been made to the incidents set forth and the principles enunciated. It seems likely, however, the Pacific scoast will love "The Clansman" for the enemies it has made. With its story of the Reconstruction Era in the South and the work of the KuKlux Klan, the story should commend itself to every American who adheres to the grand principle of "White Supremacy." This epoch-making play, which has thriven notably on the opposition it has encountered, will shortly appear at the Victoria theatre, the announcement of the exact date is awaited ment of the exact date is awaited with lively interest.

The New Grand

Lake left yesterday for Montreal by the C. P. R. and will take passage on the Allan line steamer Tunisian for Liverpool.

Mr. Richard Gorman, who is touring through Canada, and arrived in town from Vancouver on Monday, is spending the fair weck in the city, and expresses great admiration for the exhibition and the splendid display of lorses.

Mr. Norman Willard and Miss Vera Ganner, young people who are members of the Victoria West Methodist congregation, were happily plays an accompaniment to Miss Vivi

married at 8.30 o'clock last evening by Rev. A. E. Roberts at the parsonage, the best man being the bride-groom's brother, Mr. A. Willard, and the bridesmald the bride's sister, Miss E. Ganner. The bridegroom is a son of Mr. Joel Willard, of Victoria West, while the bride is the daughter of Mr. Elijah Ganner, of the Gorge. The presents which were numerous as well as beautiful and useful clearly evidenced the warm place which the happy couple occupy in the hearts of their many friends and well wishers. The newly married pair have taken up their residence on Craigflower road.

Brooks and Vedder in "The New Parties is singing the illustrated song their many friends and well wishers. The newly married pair have taken up their residence on Craigflower road.

Pantages Theatre
Unthan, the wireless wonder and the "Rag Painters" are pleasing the audionces at the Pantages theatre this week seemingly more than usual. Although Geo. Yeoman comes in for a
big share of the appreciation, Unthan
has an act that causes a great deal of
amusement. He does everything with
his toes that most people can do with
their hands. He plays the violin and
cornet and is an expert rifle shot. The
Bollingers make all kinds of pictures
out of ordinary colored rags. Jessie
Dale has a very sweet baritone voice
and her selections are well rendered.
Keeley and Parks have a neat versa-Keeley and Parks have a neat versa-tile sketch and the moving pictures are

Gould Family Divorce Cases

Gould Family Divorce Cases

New York, Sept. 21.—Mrs. Catharine
Gould, who is suing Howard Gould
for divorce, today applied through
counsel to Justice Glegerich for an
order compelling Mr. Gould to pay
he for \$120,000 a year allmony, and \$15,000 for her counsel fees. After a hearding the justice adjourned the argument until October 1, at the request
of Cornelins Sullivan, counsel for Mr.
Gould. Mr. Sullivan said that he
must have more time to examine the
papers in the case. Immediately following the temperary disposition of,
this action, the case of Helen Kelly
Gould against Frank J. Gould, for absolute divorce, was called before
Justice Glegrich, in the same court
room. The proceedings in this case
were brief, the court merely fixing
october 2nd, as the date for a hearing on the motion.

Stamps up to the value of \$500 have been issued by the government of Vic-toria, Australia.

Mr. Hawthornthwaite to Speak Mr. J. H. Hawthornthwalte is actively pursuing his campaign for Nanalmo district, and will speak at the Grand theatre on Sunday night.

Write E. J. Blaquier, Brandon, Man., wholesale agent for Amherst specials. *

There is a degree of dressing well that is profitable: The better style, the better quality and tailoring—they pay. Not so much that you can wear them two or three seasons -but that they look better while you do wear them. It pays to look well-Semi-ready Clothes give you the best

COWICHAN DISTRICT

I have for sale several properties in this well known district, ranging from a few acres in extent to large well stocked farms, which latter would be sold as going concerns. Land in the Cowichan District is being rapidly bought up, the climate is very good, there being no extremes of heat or cold, and the shooting and fishing is unsurpassed on Vancouver Island. The town of Duncans has already one bank with mere to follow, a splendid water supply, and the installing of an Electric light plant is now under consideration, it is situated some forty miles or two hours by rail from Victoria, with a double service daily. For anyone fond of a country life with lovely surroundings there is no finer or more lovely spot than the Cowichan valley. I have a representative at Duncans who knows the District thoroughly, and who will be pleased to meet intending purchasers and drive them to the different properties which are on sale. Maps and further information will be sent to anyone living at a distance who may contemplate settling in British

SUPERINTENDENT MILNE PLACED UNDER ARREST

Action Causes Some Sensation Among Terminal City People

Vancouver, Sept. 23.—A sensation in the business community was caused to-ay by the arrest of James Milne, genral superintendent of the B. C. Electic Railway and in charge of the trum more and power works in the cities of ancouver and Victoria.

Mr. Milne was formerly a prominent flicial of the street railway in Toronto, nd received his training in Cleveland, blio. He is held on the charge of false retences, growing out of alleged falsication of payrolis of the company, stending over a long period, of time. tication of payrolls of the company, extending over a long period of time. Two minor officials were recently arrested on charges of falsifying payrolls; one was sent to jail for three months and the other jumped his bail and fled to the United States. Officials of the street railway this evening declined to give details of the alleged misappropriations by Milne, but stated that the matter probably extended over several months. As the official in charge of construction, Milne handled hundreds of thousands of dollars annually in the British Columbia etites, especially in the erection of power works.

MURDER SUSPECTS

Men Arrested on Suspicion Nicola Were Traced Through Several Camps

Nicola, B. C., Sept. 23.—John Ricc and Harold Green are the two men ar-rested here on the charge of having murdered Hotelkeeper Thomet a month ago at Midway, B. C.—They had been

Japanese Mobbed

San Jose, Cal., Sept. 21.—While on heir way to the First Presbyterlan hurch to attend the service last night ve-Japanese became involved in a church to attend the service last night live Japanese became involved in a fight with four white boys, one of whom had jostled the Orientals. A mob came to the assistance of the whites and the Japanese were knocked down, kicked and rolled around the street. They fled and a mob of fifty were soon at the heels of the fugitives. Finally the Orientals were taken to jail and later released upon ball furnished by the paster of the Presbyterian church.

FISHERIES CONGRESS

nternational Gathering at Washington Takes Up Questions of Interest to Both Countries

Washington, Sept. 23.—A unique discussion marked the proceedings of the international fishery congress which began its session here yesterday, when the question of the effect on the fisheries of firing heavy guns by warships was unexpectedly brought up. The discussion arose which a communication was read by the congress from the commissioner of international fisheries, in which the belief was expressed that the heavy firing of fort and warship guns has had the effect of driving certain species of fish from the waters near the forts. It was decided to appoint a committee of three to investigate the question. Some experts differed from the above view, and the discussion was a lively one. Another subject considered was the international regulation of fisheries on the high seus, and the necessity for the increase of protection for fisheries and lobsters. The principal speaker was Secretary Strauss, of the department of commerce and labor. It was the opinion of Prof. Edward E. Prince, Dominion commissioner of fisheries of Ottawa, that the conclusion recently of a fisheries treaty between the United States and the Dominion was the greatest step that had ever been taken

A. Kelly Evans, of the Ontario Forest, Fish and Game association, of Toronto, spoke of the depletion of white-fish in Lake Ontario, He said that the appointment of an arbitration commission under the fisheries treaty between the United States and Canada undoubtedly will result in the saving of the great lakes fisheries to posterity.

Prof. Bumpas, director general of the Natural Museum of History, New York city; secretary, Dr. Hugh Smith, deputy United States commissioner of fisheries. Vice-presidents for each nation were also elected. Prof. Edward F. Prince, Dominion commissioner of fisheries, Ottawa, was selected the vice-pres, dent to represent Canada, and Dr. R. Rathbun, secretary of the Smithsonian Institute, to represent the United States.

Much Land Taken Up.

PREPARE FOR FAIR AT NEW WESTMINSTER

Provincial Government Officials Arrange Exhibit of Historical Pictures

Messrs. E. O. S. Scholefield, the Il-brarlan, and R. E. Gosnell, the archivist, are at the present time exceedingly busy in placing the finishing touches upon their work in connection with the Provincial exhibition, which opens in New Westminster upon Tuesday next.

The following greatly enlarged portraits, which will be taken to New Westminster, were shown in the ante-chamber of the legislative chamber at the Parliamentary buildings last evening, in order that all who attended the C. M. I. reception might have tan excellent opportunity to inspect them: Capt. Cook, a noble representation which is copied and enlarged from a painting in the Naval museum at Greenwich; Simon Fraser, who mapped out the Fraser river, and evidently an excellent portrait, which has been greatly enlarged from a small water color; Sir Mathew Ballile Begble, the famous judge and chief justice of British Columbia, etc., it.

lie Begbie, the famous judge and chief justice of British Columbia, etc., etc.

In addition, some 250 or 300 enlarged portraits of notable pioneers will be displayed at the New Westminster exhibition; while the gallery will further contain some 1500 smaller portraits of old timers, who for some one reason or another are entitled to remembrance and this peculiar distinction. These portraits will also from time to time be enlarged, in order to make the entire collection harmonious and uniform.

There will also be shown a great many very fine, as well as most interesting, historical views, representing Yale, Cariboo, New Westminster and Victoria, including striking minning scenes, which occurred during the tremendous gold excitement in the Cariboo district in the early days, etc., etc.; pictures of various places on San Juan island during its joint occupation by British and American soldiers; representations of Hudson Bay posts in all this western country, when these posts extended clear down to the Columbia river, and about 100 miles from its mouth; Nisqually, now in the state of Washington, although in the forties all the territory between the present boundary line and the Columbia river and about 100 miles from its mouth; Nisqually, now in the state of Washington, although in the forties all the territory between the present boundary line and the Columbia river was known as Oregon; Fort McLead, Fort St. James, in our interior and in the Cariboo district, as well as many others of a very similar description.

The unveiling of Simon Fraser's statue will take place on Wednesday afternoon next, the 30th instant, when the Hon. Mr. McBride, who will perform this ecremony, will deliver a suitable address, Other speakers upon this

this particular branch of agriculture some thirty years ago, has the distinction of being among the very first timulgrants who came into these semisavage and wholly endeveloped regions, having made the arduous trip in an old-time prairie schooner. Two or three years ago he hitched up a yoke of exen to a prairie schooner and drove back across the continent into New York State, returning in the same primitive fashion and consuming some 2½ years in the journey, which was no inconsiderable feat for a man in the 78th year of, his age. While in-the course of his wanderings he erected monuments in order to mark out, and perpetuate the memory of the famous Oregon Trail. Now this same Mr. Meeker will be present at the Exhibition on Tuesday next with a yoke of oxen and a prairie schooner, which is made as far as possible out-of-portions of the old original vehicle, while in all respects it will be its exact duplicate in every particular. It is further expected that he will head the procession of stock, adding enormously to the interest and the picturesqueness of the display. Mr. Wellington Dowler, the city clerk, has written memorial lines upon Simon Fraser, which will be read at the funvelling.

It was also intended to have had shown living pictures representing Simon Fraser making his trip by canoe down the noble river which now bears his name, as well as many most interesting historical views, but owing to lack of time, apart altogether from the very large expenditure which this exhibition must have occasioned, the project was perforce abandoned.

CONFESSED CRIME

Saskatoon Man Gives Evidence Against Himself and Two Other Robbers

Robbers

Saskatoon, Sask., Sept. 23.—An Interesting development involving the two men under arrest for Monday's murderous assault took place this morning. Another man is added to the brace of scoundrels already in custody. He is John Armstrong, and gave himself up at the police station today, confessing that he had been guilty with the others of the robbery recently perpetrated on an elderly man named Troke, who at the time was far gone in drink. Two of the men held Troke while the third relieved him of \$60.50, dividing the men held Troke while the third relieved him of \$60.50, dividing the money equally between them. The victim was later run in by the police and complained the following morning of having been robbed.

Armstrong was taken to the cells, where Snow and Burton are confined, and there identified them as his comrades in crime. He was promptly locked up.

Evidently Armstrong feared that the capture of the other two might lead to their confession of the Troke robbery and himself up, but also landed the police his full share of the stolen money. He is a man of about 35 years of age, who has done laboring work in an intermittent way around the city for some time past. The police say that there are too many of this undesirable class in Saskatoon, and that such crimes as have occurred of late have been perpetrated by men of the lower type, who work occasionally, loaf, and drink incessantly. Such type will in future be dealt with very strenuously. ncessantly. Such type will in future be dealt with very strenuously.

Talk of Labor Candidate Saskatoon, Sept. 23.—The laboring

men of the city talk of coming with a candidate at the coming ci-tions. So far, their organization somewhat nebulous.

Railway Commission

Saskatoon, Sept. 23.—The rallway commissioners arrived here at 2.3 this afternoon. Nothing of any ac-

Paris has a bigger demand for fals air than can be supplied.

Andrew Kiley died at Hamilton fron he effects of poison lyy.

The oven does the baking, the fire-box controls the oven heat, and the grates hold the coal or wood that produces the heat, so

THE GRATES are important. Sask-alta Range

"Sask-alta" Double Duplex Grates are made in four pieces, each grate shaken separately. Ashes over one grate can be shaken without wasting good fuel over other grate. No poking necessary, thereby saving fuel. Dampers at both ends of fire-box secure perfect drafts. When grates are inverted for wood a patent clamp retains them in position. The easiest-working way is the surest-serving way - and that's "Sask-alta" way.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it lacurable. Sclence has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh. Cure, manufactured by F. J. Cheney & Co., Toledo, Ohlo, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

STOCK MARKET TAKES

TOO SUDDEN A TURN

Suspicion Aroused By Arrest of Downward Movement of Prices

New York, Sept. 23.—The tranquil state into which the stock market rell today after the turmoil of yesterday, forms a strong contrast. The transformation was so sudden as to appear unnatural, and was for that reason, made the ground for some suspicion.

Bears continued to cover today. Very large buying orders were executed by a few influential stock exchange houses who were most active in the recent selling. Their transactions were largest in the two Harriman Pacific stocks and in Reading. These are the opera-

SALE OF LAND FOR UNPAID TAXES AND SCHOOL RATES IN THE VICTORIA ASSESSMENT DISTRICT,

I hereby give notice that on Friday, the 2th day of October, A. D., 1908, at the hour of 10 o'clock a.m., in the Maple Committee Room of the Parliament Buildings, Victoria, B. C., I shall sell by public auction the lands of the persons in the list hereinafter set out for the delinquent taxes unpaid by the said persons on the thirty-first day of December, 1907, and for interest, costs and expenses, including the cost of advertising the said sale, if the total amount due is not sconer paid.

tions which report places to the account of the millionaire capitalists fed with the Standard Oil and Harriman Interests.

The buying today created the impression that a further fall in prices was to receive the countenance of those powers no longer. The dull season of the market after the first hour gave this element much anxiety. Almost half the day's business was done in that hour. Practically the extreme range of the day's price fluctuations was established also in that time. The higher opening prices brought out realizing sales, with a relapse which wiped out the gains, and prices rose ngain before the end of the hour, and this fixed the limits of the price movement forward. The day's news was not important, and was little regarded.

There was a rebound from the recent declining tendency in the price of copper warrants in London. These called renewed attention to the close correspondence there has been between the price movements in copper and stocks throughout the summer speculation. This correspondence has been taken to confirm the opinion of the responsibil.

the ruling of the cup trustees will not be effective.

P. D. Ross, of Ottawa, one of the trustees, has written C. A. Welsh, of the Westminster club, as follows:

"The fact that two of the strongest men on the team, Alex, Turnbull and George Rennle, will be absent from the lineup at the time the games would have to be played cannot possibly affect their ruling, as it would be creating a bad procedent to disallow a challenge because the champion team was not at its full strength all the year round; such a condition of affairs has never before presented itself to my consideration, and I have no alternative but to order the acceptance of any challenge which may reach me providing the challenging team is qualified to compete.

No Chance This Fall

No Chance This Fall

No Chance This Fall

"However, it is no use meeting the devil half-way. As no challenges have yet been received, and the season is now far advanced, there seems little probability of any team deciding to make the long trip across the content in search of the silverware. The necessary preliminaries in connection with Minto cup games would make it impossible for the matches to be played until well towards the end of October at the earliest, and it is unlikely that any castern team would care to go out west to play lacrosse at so advanced a date."

Turnbull and Rennic, of New Westminster, leave today for the east to join the Olympic team for England. The Canadian team will reach Liverpool about the 10th, and will go direct

join the Olympic team for England The Canadian team will reach Liver-pool about the 10th, and will go direct

to London. The team will stay at the Ivanhoe hotel, where the Capitals were located while in London, and daily practices will be held at the stadium in preparation for the series of games. The stadium and a complaced at the disposal of the Canadian candidates. The men will run while aboard the Empress of Britain to keep in shape, and will have plenty of time to recover their land legs when they get to the other side.

Three Teams Entered

Three Teams Entered

Three Teams Entered

Three teams are entered in the world's tournament. The Olympic committee has made all arrangements and the games between the Canadian, English and South African teams will be played between Tuesday, October 20, and Saturday, October 24. The matches are to take place at the stadium, and gold medals are to be awarded the winning team.

It has been reported that the C. A. A. U. contemplates entering a protest against some of the players who have been chosen, but no such kick need be expected, for although the Olympic committee had ruled that the C. A. A. U. is not further bound by the peace agreement, the governing body is just as anxious as the Olympic committee that Canada should win the championship, and will not raise a hond against any member of the team. championship, and will not raise a hand against any member of the team.
